FOCUSED APPROACH TO 2027 COURSE OFFERING

The SAIW offers industry developed training programmes, which aim to provide the candidates with the necessary skills to meet industry needs.

SEE THE FULL LIST IN THE TABLE ON THE NEXT PAGE WHICH PROVIDES CLEAR INFORMATION OF THE COURSES OFFERED.

Non-scheduled & Regional Courses

DEMAND DEPENDENT

Despite this streamlined approach, the SAIW remains committed to offering scheduled and non-scheduled regional courses in Cape Town and Durban. A minimum of five students is required per course to run. As soon as the minimum number of students have booked in your region, the course will be scheduled.

HOW CAN SAIW POWER YOUR CAREER

For more information, our client liaison officer is standing by on **info@saiw.co.za**

Do you have Matric Maths & Physical Science ?

YES

Do you enjoy seeing the practical application of science.

YES

Consider a career in NDT and learn to test materials or products for imperfections without destroying them using processes based on applied and proven principles.

NO

Would you like a career as a Supervisor or Manager?

NO

Are you interested in metals fabrication?

NO

Consider a career in vessel and piping inspection (CP or IPE).

YES

Consider a career in Welding Inspection. You could also work in Quality Assurance where you'll compile the relevant records on how a product was manufactured.

YES

Consider a career in Welding Coordination by becoming a welding supervisor/ foreman where you'll be leading welding teams and manage the day to day operations of a fabrication shop.

NO

But you have good hand-eye coordination and like working with your hands and creating things?

YES

Become an International Welder

Our series of Practical Welding courses will give you the skills to expertly join various metals together. We offer the IIW International Welder qualification programme recognised in more than 58 countries around the world.

NO

TEST

Undertake a proficiency test and pursue a career in NDT or QC Course – Inspection.

Don't forget! You can still pursue a career in NDT by writing a proficiency test and completing less technical NDT programmes of MT, PT and VT or if you'd like to become a Level 1 and 2 welding inspection (SAIW Level 1 & 2), complete our Quality Control course first.

CHOOSE A CAREER IN WELDING

Using the SAIW to deliver your preferred programme will ensure you a bright and prosperous career, so register today!

For more information contact our Client Liaison on 011 298 2100.

In recent decades, welding has become a dominant process in the fabrication of industrial products and in the building of structures from steel. It is used in all phases of production and is needed not only nationally but also internationally in almost every industry ranging from micro-electronics to construction of petrochemical plants, power generation, buildings and transport. Due to the diversity of welding-related projects, there is excellent flexibility to switch industries without the need to change your career.

The fact that welding is in a strong growth phase accounts for the mounting interest in it as a career. Completing a course in welding opens the doors to a lucrative and rewarding career and solid progression, should it already be your profession of choice. Similarly, those who become welding inspectors, welding coordinators, non-destructive testing (NDT) technicians, professional welding engineers or designers can look forward to extremely rewarding career opportunities.

The SAIW has been offering training courses in both welding and NDT technologies since the late 1970s. You can choose to be a practical welder where you will join materials together using any of the various welding processes. As a welder you can progress your career by further study in welding coordination to become a welding supervisor/foreman. The welding coordination courses are not only for welders. People hoping for a career in leading welding teams and managing the day-to-day operations of a fabrication shop can enrol on these courses too, for example: welding engineer, welding technologist, welding specialist etc.

Our courses also present opportunities for you to work as a welding inspector, a career in which you will be responsible for verifying that the welders are following their work instructions, and the welding supervisors are doing their work according to approved and implemented procedures. As a welding inspector you can also work in quality assurance where you compile the relevant information for records on how a product was manufactured.

The SAIW also offers NDT courses in six different testing methods. Personnel form part of the chain of various fields of expertise, which are used to ensure the world is using high quality products which pose little risk to the end user.

Please refer to contacts on page 14 | www.saiw.co.za

Personnel test materials or products for any imperfections without destroying the products or materials and is not only limited to testing of welds, but can be extended to various product sectors such as castings, forgings, tubes etc. and applied in most of the industrial sectors such as pre-and in-service testing, power generation, petrochemical etc. This is achieved by using various applied scientific principles and therefore, a career in NDT will never stagnate. There will always be the opportunity to diversify into other methods or alternatively, you can specialise in one or more methods to an advanced level of competency.

SAIW courses are intended to meet best practice international standards and many are accredited by the International Institute of Welding (IIW).

SAIW inspection courses also fulfil the requirements of local certification programmes for inspection personnel (SAQCC IPE and CP) which are approved by the Department of Employment and Labour.

SAIW practical welding courses are accredited by IIW for the International Welder (IW) programme.

The SAIW offers training courses at its **JOHANNESBURG CAMPUS**, and in **DURBAN** and **CAPE TOWN** and **SECUNDA**.

MANY SAIW COURSES ARE SUITABLE FOR PRESENTATION AT IN-COMPANY TRAINING FACILITIES.

BECOME AN SAIW MEMBER

Membership Benefits apply to corporate members in good standing.

PRICING (Including VAT)

Corporate	Individuals
R 8 597	**R 1 100**

VISION

To be the **preferred provider** of welding, NDT and related technology services to industry in Africa to enable economic growth through developing our **National Welding Capabilities.**

MISSION

To deliver **the highest quality of customer service and technical excellence** in training, technical services and certification of companies and personnel.

VALUE PROPOSITION

SAIW empowers members to **improve productivity and quality whilst reducing costs** in all welding related manufacturing activities through training and qualification; certification of companies and personnel; and technology transfer.

PURPOSE STATEMENT

The SAIW is dedicated to the implementation of standards and training in welding fabrication and related technologies to ensure the **reliability and integrity of welded equipment** for the safety of personnel and plant.

Please refer to contacts on page 14 | www.saiw.co.za

TRAINING

- ✓ 7.5% discount on training courses for corporate members
- ✓ 7.5% discount on revision and rewrite examinations for corporate members

CERTIFICATION

- ✓ 5% discount on company certifications
- ✓ 5% discount on personnel certifications
- ✓ Free initial audit for ATB application
- ✓ Free initial company certification marketing visit

TECHNOLOGY

- ✓ Free telephonic consulting and code interpretation
- ✓ Free independent third party NDT report review
- ✓ 5% discount on technical services
- ✓ 5% discount on laboratory services
- ✓ 10% discount on annual Welding Seminar
- ✓ Free access to SAIW library
- ✓ Free access to read-only standards
- ✓ 5% discount on gauges
- ✓ Exclusive access to industry trends, analysis and upcoming project leads

MARKETING AND CORPORATE MEMBERSHIP

- ✓ Use of “Member of SAIW” logo and certificate
- ✓ Professional recognition “Member of SAIW”
- ✓ Eligible for AGM voting rights and board membership
- ✓ 10% discount on advertising rate in African Fusion
- ✓ Free African Fusion subscription and free potential editorial in African Fusion
- ✓ 10% discount on rates for SAIW facilities
- ✓ Free job adverts on website
- ✓ Access to regional SAIW Sports Days for sponsorship opportunities, entertaining customers and networking
- ✓ Access to Annual Dinner and associated sponsorship opportunities
- ✓ Awards winners marketing “bragging rights”

MATERIAL TESTING
LABORATORY

THE SAIW HAS A MATERIAL TESTING LABORATORY ON SITE

Our in-house laboratory is fully equipped to perform mechanical, metallurgical, and in-house non-destructive testing (NDT) on welds and metallic samples.

Our material testing laboratory provides comprehensive testing and consulting services to various industries. These services include weld procedure qualification, welder qualification, welding consumable testing, failure analysis, welding-related research and development, and positive material identification.

South African National Accreditation System

CERTIFICATE OF ACCREDITATION

SOUTH AFRICAN INSTITUTE OF WELDING NPC

Co. Reg. No.: 2015/060118/08

MATERIALS TESTING LABORATORY

Facility Accreditation Number: T0693

is a South African National Accreditation System accredited facility provided that all conditions and requirements are complied with

This certificate is valid as per the scope as stated in the accompanying schedule of accreditation, Annexure "A", bearing the above accreditation number for

MECHANICAL TESTING

The facility is accredited in accordance with the recognised International Standard

ISO/IEC 17025:2017

The accreditation demonstrates technical competency for a defined scope and the operation of a quality management system

While this certificate remains valid, the Accredited Facility named above is authorised to use the relevant accreditation symbol to issue facility reports and/or certificates

Mr P Oliphant
Acting Chief Executive Officer

Effective Date: 20 June 2026
Certificate Expires: 19 June 2031

The SAIW material testing laboratory, **laboratory number TO693**, is accredited by SANAS to comply with ISO 17025.
The SAIW material testing laboratory is managed by a team of qualified and experienced metallurgists.

sanas
Testing Laboratory
T0693

All equipment needed for test sample preparation is available in-house

ABOUT PRACTICAL WELDING

At the SAIW, we take immense pride in offering a diverse range of hands-on training programmes that empower individuals with the knowledge and expertise required to excel in welding.

Our practical welding training covers a spectrum of specialised areas and caters to both beginners and experienced welders.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT PRACTICAL WELDING

Our experienced instructors foster a hands-on learning environment, whether you're pursuing welding as a career or enhancing your skills. We believe that practical welding proficiency is key to success in the welding industry.

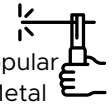

JOIN US TO EMBARK ON A JOURNEY OF SKILL DEVELOPMENT AND PROFESSIONAL GROWTH IN THE EXCITING WORLD OF WELDING.

WELDING ESSENTIALS

Welders play a crucial role in joining various metals using electric arc processes, utilising gas shields or flux to protect the molten weld area from contamination by the surrounding atmosphere. They interpret engineering drawings, adhere to standards, and understand the impact of welding on materials.

WELDING PROCESSES

Our practical training encompasses popular welding processes, such as Shielded Metal Arc, Gas Metal Arc, Gas Tungsten Arc, Flux Cored Arc, Submerged Arc and Laser Beam Welding. We tailor programmes to individual needs.

APPLICATIONS

Welders fabricate structures, pressure vessels, and more. They select equipment, adjust variables, and employ cutting and grinding techniques to prepare joints.

TRAINING OPTIONS

Our training is flexible, offered week by week at the SAIW or in-house, catering to upskilling and qualification needs. We also offer the International Institute of Welding's (IIW) International Welder (IW) qualification programme.

IIW WELDING TRAINING PROGRAM

SAIW's IIW Welding Training programme aligns with international standards and addresses the need for highly skilled welders and to achieve global harmonisation in the training, examination and qualification testing of welders.

IIW FAST TRACK PROGRAM

Experience an accelerated journey to an IIW Standard Diploma, ideal for experienced welders, who, depending on the welder, can achieve qualification in one to two weeks, including all training and assessment at a substantial cost savings.

ROBOTIC WELDING

Stay ahead with our robotic welding training, enabling you to operate and program welding robots efficiently in industries embracing automation.

PRACTICAL WELDING

COURSE INFORMATION

The SAIW is dedicated to providing world-class practical welder training benchmarked against international welding standards and international welder programmes. We therefore strive to ensure that when a candidate exits any of our tailor-made programmes he/she can be assured of good prospects in securing employment with excellent financial rewards.

These highly sought-after courses can be developed to suit company or individual needs and are conducted at the SAIW practical welding school. They can also be offered in-house.

Practical welding courses are tailored to accommodate any welding skill level, from beginner to experienced. Training is thus designed to meet the needs of the individual taking into account the entry skill level and the desired end result. The pace of progress is determined through practical assessments and so the duration will vary from one person to the next.

ENTRY REQUIREMENTS

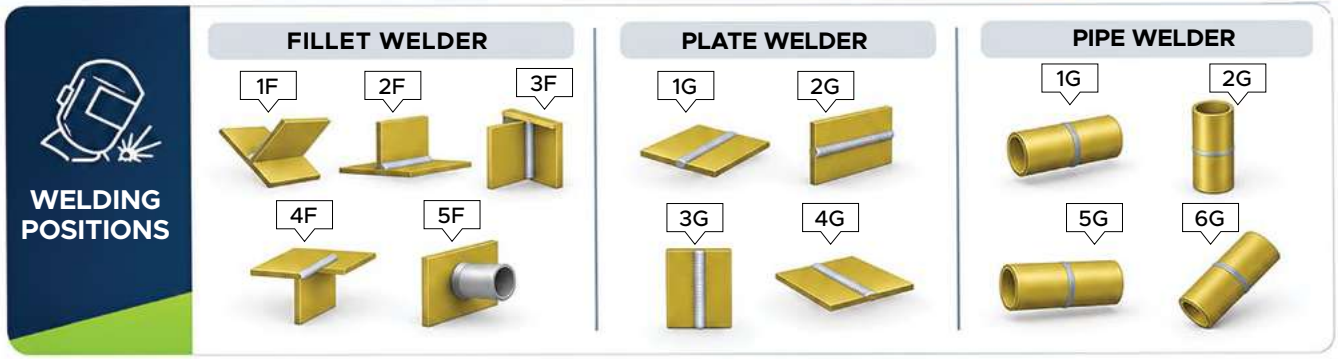

- ✓ Good hand-eye coordination is the most important aspect to allow one to excel in welding
- ✓ Appropriate health as well as physical and mental capability is also required

Please refer to contacts on page 14 | www.saiw.co.za

PRACTICAL WELDING

Examples of the welding positions commonly used in welder training can be seen in the diagram below.

Course Duration

Individuals seeking to learn how to weld or those wishing to acquire a new skill or upskill themselves can attend any Monday to Friday session, once a booking is confirmed.

Assessment

Outcomes of training will depend on the individual's ability to successfully undertake a Welder Performance Certification test as mandated by the various construction standards i.e. ASME IX, AWS D1.1-6 and ISO 9606.

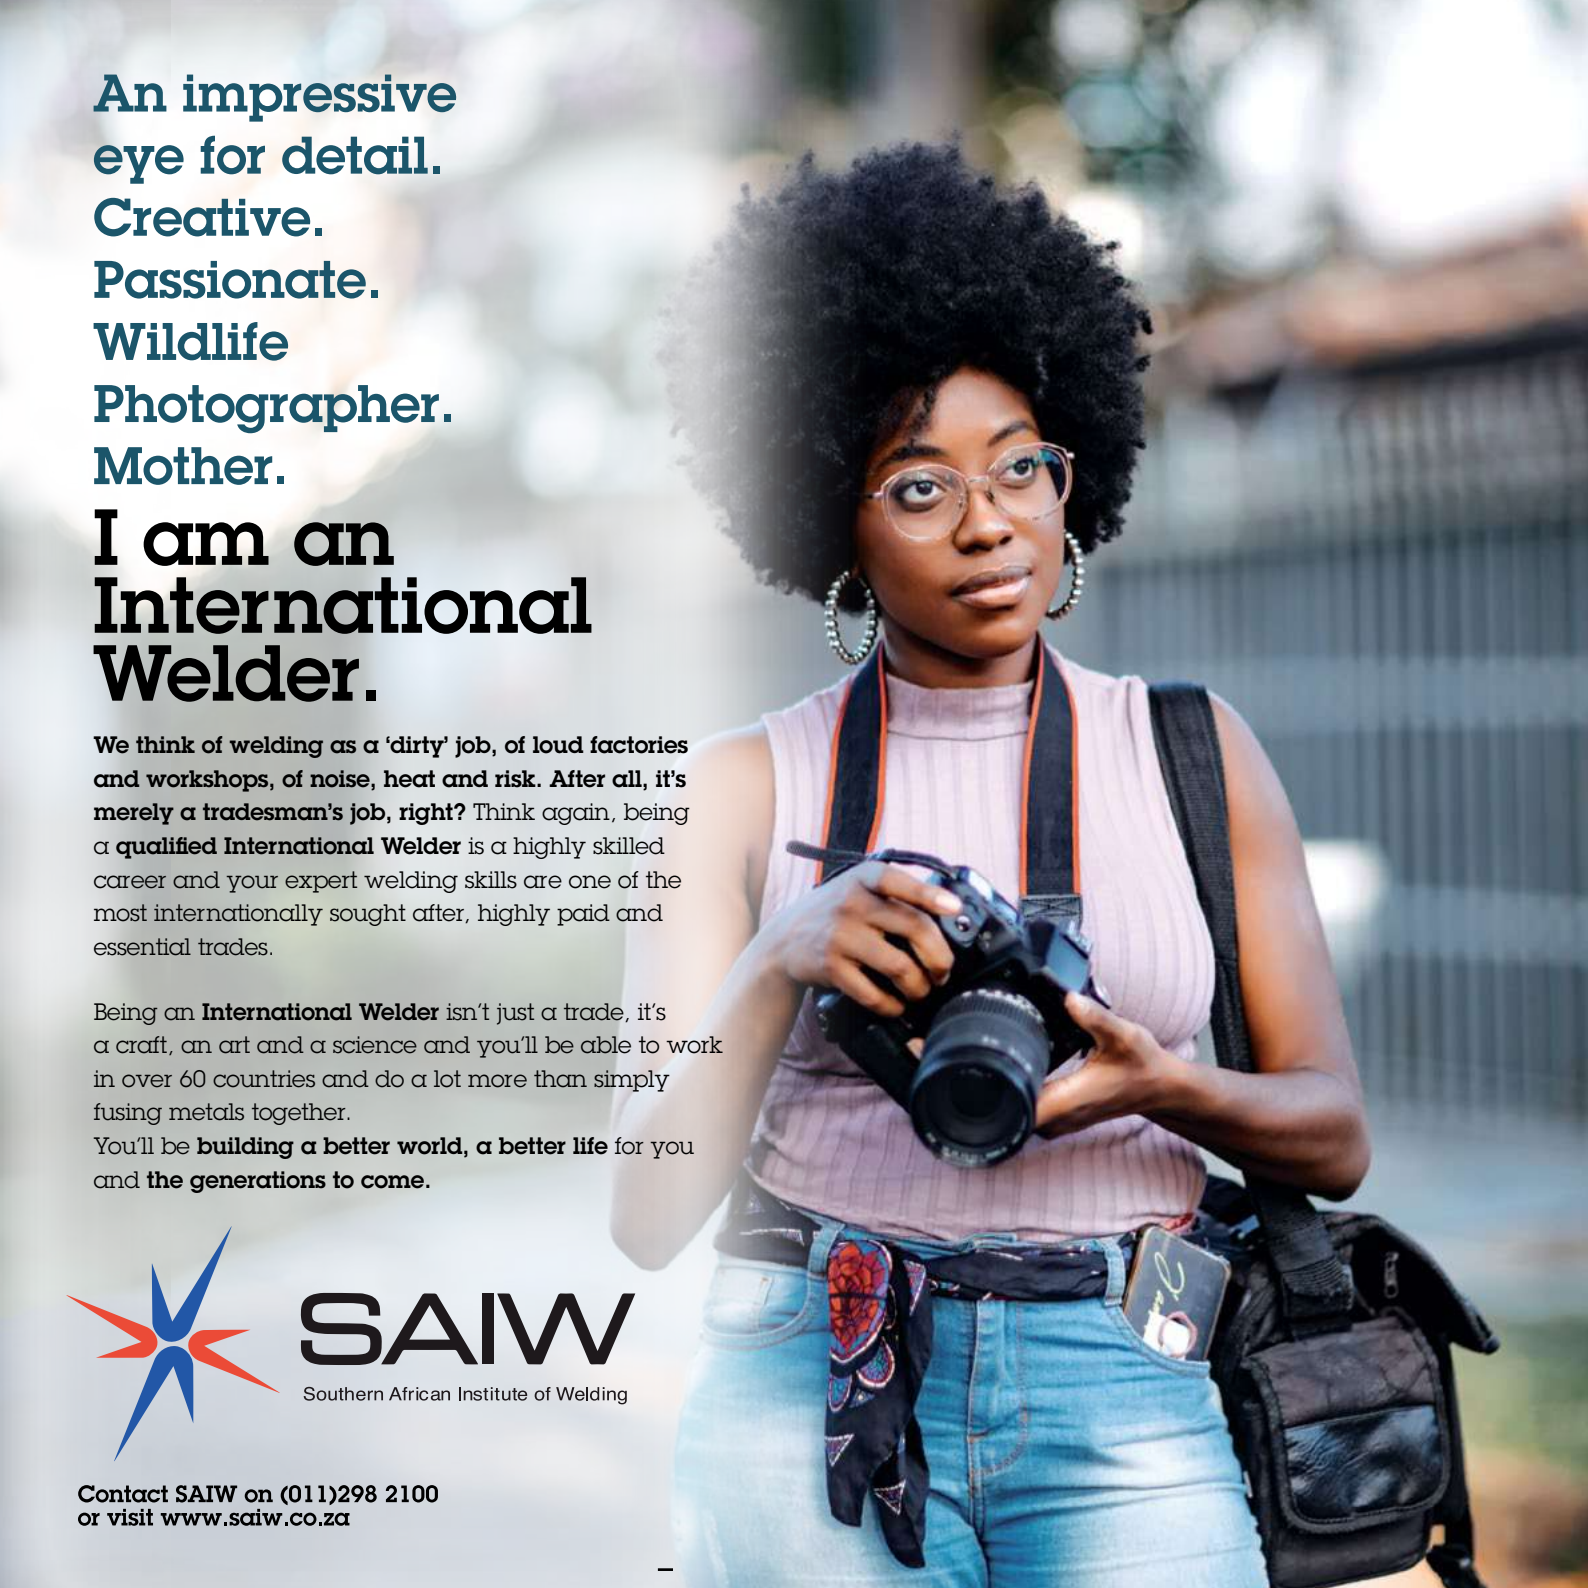

Course Schedule

The price of the course is **R 8 711** per week. (Including VAT).
The above pricing includes certification testing (Coding) to the desired Construction Standard most applicable to the work. Should only a welder competency test be required, **R3 862** will be charged per welding process, per position, per material.

A 25% surcharge is applied if the material is stainless steel or aluminium.

*Prices subject to change

Please refer to contacts on page 14 | www.saiw.co.za

An impressive eye for detail. Creative. Passionate. Wildlife Photographer. Mother.

I am an International Welder.

We think of welding as a 'dirty' job, of loud factories and workshops, of noise, heat and risk. After all, it's merely a tradesman's job, right? Think again, being a **qualified International Welder** is a highly skilled career and your expert welding skills are one of the most internationally sought after, highly paid and essential trades.

Being an **International Welder** isn't just a trade, it's a craft, an art and a science and you'll be able to work in over 60 countries and do a lot more than simply fusing metals together.
You'll be **building a better world, a better life** for you and **the generations to come.**

SAIW

ABOUT
IIW INTERNATIONAL WELDER

COURSE INFORMATION

The International Institute of Welding (IIW) has adopted the International Welder (IW) programme to address the need for highly skilled welders and to achieve global harmonisation in the training, examination and qualification testing of welders.

Training and assessment in the IW programme are linked to the requirements of the international standard, ISO 9606 qualification testing of welders. The ISO 9606 standard is widely used in South Africa, but it is important to note that it is similar to other standards, which are relevant in South Africa, eg. ASME IX and AWS D1.1.

The IW programme provides a combination of theoretical knowledge and high-level practical skills assessed by tests of increasing difficulty and by theoretical examinations.

The programme is presented at three levels – fillet, plate, and pipe welder. Trainees are required to start with fillet welding and must pass a practical competency test before progressing to the next level. Training periods for practical welding vary from person to person.

Experienced welders are not required to undertake unnecessary practical training and may enter the IW programme at any level subject to completing the relevant level practical qualification test including those required for lower levels. A welder fully competent in fillet, plate and pipe welding would undertake the practical test for all three levels and would then undertake only the relevant theory components.

It is important that at each level there is an associated level of theory, plus there may be process specific and material specific theory modules which are applicable.

ENTRY REQUIREMENTS

- ✓ Good hand-eye coordination is the most important aspect to excel in welding
- ✓ Appropriate health as well as physical and mental capability is required to enter at Fillet Welder level
- ✓ Access to higher levels may be allowed upon passing of relevant theoretical examinations and demonstration of required practical skill

FAST TRACK INTERNATIONAL WELDER QUALIFICATIONS

FOR EXPERIENCED WELDERS

The SAIW offers a streamlined International Welder Qualification through a fast-tracked IIW Standard Diploma, which has been successfully implemented over the past three years.

This flexible format is designed for experienced welders who wish to obtain international recognition in a shorter time frame – typically one to two weeks, including practical training, testing, and assessment.

PLEASE NOTE:

Participants are required to pay only for the number of test samples used in their selected process or programme.

Minimal practical training is provided, based on the individual's experience and skill level.

Theory training and examination fees are charged separately, depending on the qualification level.

This approach allows skilled welders to fast-track their IIW qualification efficiently and cost-effectively while maintaining full compliance with international standards.

WHY LAUNCH THIS TYPE OF TRAINING?

Most welders have developed a speciality and are highly experienced in one position and one area. They therefore do not need or want to go through the entire IIW Programme and require a focused qualification that recognises their specific area of expertise.

For example, a structural steel welder would prefer to focus on plate welding theory while tube welders in the petrochemical or power generation sectors are far more familiar with specialised tube welding which forms the bulk of what they do.

Please refer to contacts on page 14 | www.saiw.co.za

FAST TRACK INTERNATIONAL WELDER QUALIFICATIONS

FOR EXPERIENCED WELDERS

The new streamlined option bypasses the need for experienced welders to go back to basics and complete the full course and provides the highly specialised knowledge and assessment to take experienced welders to the next level.

Upon completion of the course, students get an International Welder certificate which is proof of them having trained in a certain position, process and material.

COURSE STRUCTURE & CRITERIA

- ✓ The IIW Standard Diploma covers the theory behind a single welding process either fillet, plate or pipe in the form of lectures as well as written and practical tests. If these are passed the student receives an IIW Diploma and a Welding Certificate of record which provides unequivocal proof that the welder complies with the IIW standards.
- ✓ To access the course, a student must have been a full-time welder for at least two of the previous three years and possess a valid welder qualification certificate. They also need a CV with the endorsement from a current or previous employer to prove their experience.

REASONS TO OBTAIN THE DIPLOMA

THE KEY BENEFITS OF OBTAINING THE IIW DIPLOMA ARE:

- ✓ Qualification in an international level of welding will make students much more marketable and increase their job prospects locally and allow them to apply for jobs overseas.
- ✓ Springboard for more advanced careers in welding inspection and coordination. These jobs add much needed depth of experience on welding projects at ground level and are higher level skills.

FUTURE FOCUS

The SAIW is committed to meeting the requirement from local industry for South African welders with internationally recognised qualifications who can add value to new and maintenance projects in the petrochemical, power generation and oil and gas industries, which will experience an investment boom.

Please refer to contacts on page 14 | www.saiw.co.za

IIW INTERNATIONAL WELDER

PRICING – TYPICAL DURATIONS

The estimated time required for the various processes and levels is shown below, but this is dependent on the individual's aptitude.

Should the individual complete a process and level early credit will be given to contribute to the next level or process.

Process	SMAW (MMA) Stick Welding			GTAW (TIG) Argon Welding			GMAW (MAG) & FCAW CO2 & Flux Core		
Level	Weeks	Price	Price/ week/test	Weeks	Price	Price/ week/test	Weeks	Price	Price/ week/test
Fillet	10	R 68 030	R 6 803	6	R 42 388	R 7 065	12	R 81 215	R 6 768
Plate	10	R 69 697	R 6 970	6	R 44 517	R 7 420	10	R 70 876	R 7 088
Tube	6	R 45 822	R 7 637	4	R 32 574	R 8 144			
Tests	6 Test Pieces			5 Test Pieces			**4 or 8 Test Pieces		
Theory***	2	R 13 610	R 6 805	2	R 13 610	R 6 805	2	R 13 610	R 6 805
TOTAL	**28**	**R184 260**	**R 6 580**	**18**	**R 133 089**	**R 7 361**	**24**	**R 165 701**	**R 6 894**

*Refer to page 31. The total theory training is two weeks for fillet, plate and pipe; for all processes and materials.

**Depending on either process or both processes

***International Harmonised Examination

*Prices subject to change

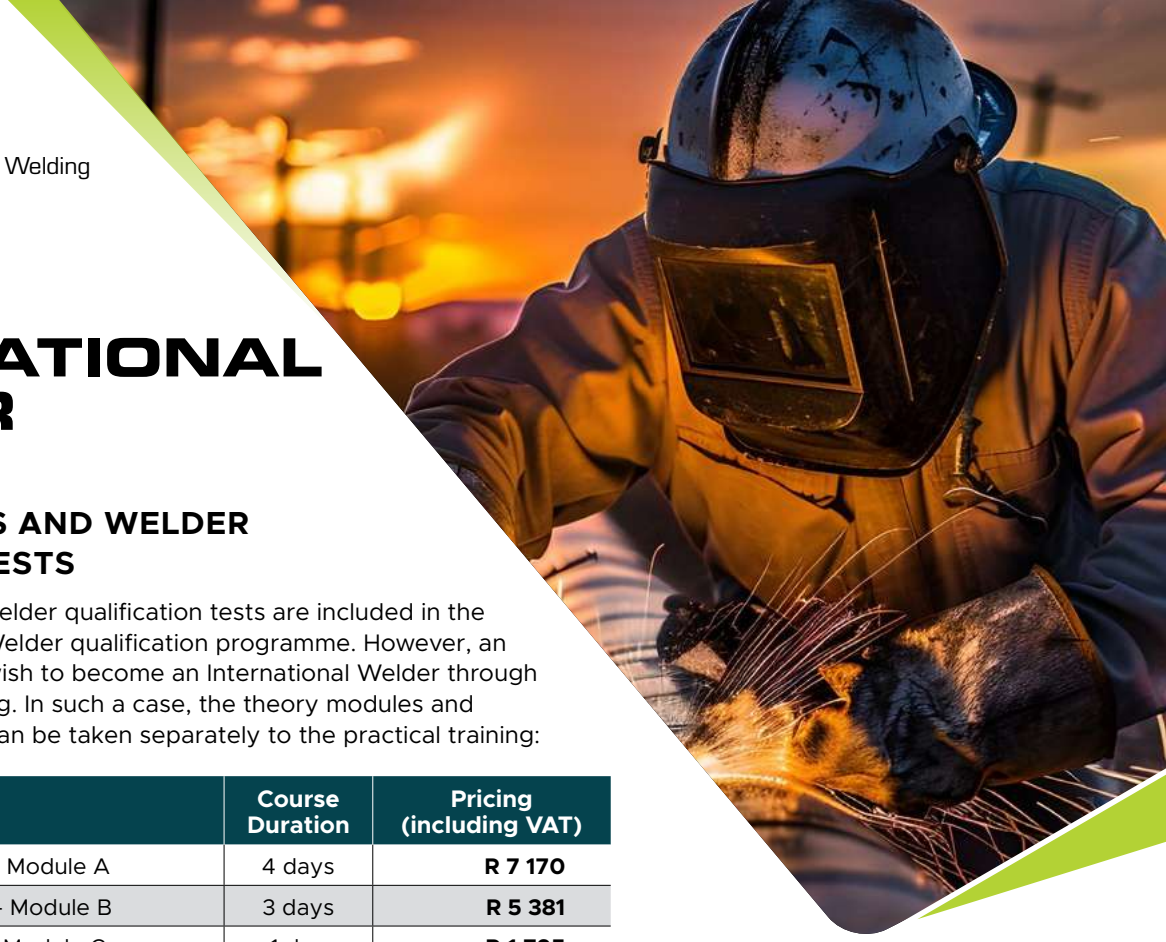

THE ABOVE PRICING INCLUDES

- ✓ Practical welding training
- ✓ Welder certification testing (coding)
- ✓ Theoretical training and examination fees
- ✓ IIW Diploma after successful completion of the course

A 25% surcharge is applied if the material is stainless steel or aluminium.

Should only a welder competency test be required, **R3 609** will be charged per welding process, per position, per material.

Please refer to contacts on page 14 | www.saiw.co.za

IIW INTERNATIONAL WELDER

THEORY MODULES AND WELDER QUALIFICATION TESTS

The theory modules and welder qualification tests are included in the price of the International Welder qualification programme. However, an experienced welder may wish to become an International Welder through recognition of prior learning. In such a case, the theory modules and welder qualification tests can be taken separately to the practical training:

	Course Duration	Pricing (including VAT)
International Fillet Welder – Module A	4 days	**R 7 170**
International Plate Welder – Module B	3 days	**R 5 381**
International Pipe Welder – Module C	1 day	**R 1 795**
Process Specific – Modules SA, ST and SM	1 day	**R 1 795**
Material Specific – Modules PSS and PAL	1 day	**R 1 795**
Welder Qualification Tests		**R 3 862 each**

*Prices subject to change

EXPLORE THE FUTURE OF WELDING EDUCATION WITH VIRTUAL REALITY

Welcome to the SAIW's Virtual Welder Welding Academy, where we are revolutionising welding education through the integration of cutting-edge Virtual Reality (VR) technology. Our aim is to provide an unparalleled learning experience that is not only more cost-effective but also more immersive and effective than ever before.

IMMERSIVE WELDING TRAINING

The Welding Academy of the Virtual Welder offers a world-class solution for immersive welding training. We recognise that welding is a skill that demands both theoretical knowledge and hands-on expertise. That's why our academy combines progressive theoretical and practical modes with hands-on VR sessions to create a comprehensive learning experience.

FOUR LEVELS OF MASTERY

At our VR Welding academy, students embark on a hands-on journey through four distinct levels, each escalating in complexity. These levels are designed to ensure that students build a solid foundation and progressively advance their skills, ultimately becoming proficient welders. With each level, students gain confidence and proficiency in both MIG/MAG and TIG welding techniques.

GUIDANCE AND ASSISTANCE

To aid in the learning process, we provide an assist mode that is available throughout the training. This feature guides students through the intricacies of each level, ensuring they grasp essential techniques and principles. In this way, students learn at their own pace and have the support they need to succeed.

Please refer to contacts on page 14 | www.saiw.co.za

EXPLORE THE FUTURE OF WELDING EDUCATION WITH VIRTUAL REALITY

Shaping the Future of eLearning

Our VR Welder is at the forefront of shaping the future of eLearning. By integrating virtual reality into welding education, we are creating an engaging and dynamic learning environment that prepares students for the real-world challenges of welding. Approximately 50% of your learning time will be spent using our VR Welder, allowing you to gain practical experience and proficiency in a controlled, risk-free environment.

Blend of VR and Welding School

We understand the importance of practical, hands-on experience in welding. That's why the remaining 50% of your learning time will be spent in our state-of-the-art Welding School. Here, you'll have the opportunity to apply your knowledge in real-world welding scenarios, under the guidance of experienced instructors.

SPECIAL OFFER

30% DISCOUNT ON IIW INTERNATIONAL WELDER PROGRAMME

If you're interested in enrolling in our IIW International Welder programme using this blended approach, you will qualify for a 30% discount. This is an exclusive opportunity to receive world-class welding education at a reduced cost, making it more accessible to aspiring welders.

Join us at the SAIW's Virtual Welder Welding Academy, where we are breaking new ground in welding education. Explore the future of welding training with us and embark on a journey toward becoming a skilled and proficient welder. **Your future in welding starts here, with the power of virtual reality** and hands-on experience. Enrol today and take the first step towards an exciting and rewarding career in welding.

ABOUT ROBOTIC WELDING

COURSE INFORMATION

The Robotic Welder training course is designed to give the candidate the necessary theoretical and practical knowledge on welding technology by equipping him/her with the skills to manage all aspects of a robotic welding operation including design and programming of the welding task, safety and troubleshooting of the welding operation.

The course also serves as a foundation to more advanced robotic welder training.

SAIW – Robotic Welding

INTRODUCTION TO LASER WELDING

COURSE INFORMATION

The Introduction to Laser Welding course is designed to provide a comprehensive introduction to laser welding technology, focusing on the fundamentals, applications, and hands-on practical training.

Candidates will engage with both theoretical and practical elements of laser welding, equipping them with the necessary skills and knowledge to effectively utilise laser welding in various equipment settings.

Participants will leave the course with a solid foundation in laser welding, equipped with the skills necessary to apply this advanced technology effectively in their respective fields.

ENTRY REQUIREMENTS

- ✓ Good hand-eye coordination
- ✓ Basic understanding of welding principles is beneficial but not mandatory

Scan to download the SAIW Course Prospectus App.

confidence.lekoane@saiw.co.za

Please refer to contacts on page 14 | www.saiw.co.za

LASER WELDING

Course Duration	Pricing (including VAT)
3 days	**R 5 308**

*Price subject to change

- ✓ The above pricing includes theory, practical and certification testing (coding)
- ✓ 25% surcharge is applied if the material is stainless steel or aluminium

COURSE OUTCOMES

By the end of this course, candidates will be able to:

- ✓ Understand the fundamental principles of laser welding technology
- ✓ Identify different welding processes and their applications
- ✓ Safely operate laser welding equipment
- ✓ Recognise various materials and their properties in relation to laser welding
- ✓ Adjust process parameters for optimal welding results
- ✓ Perform hands-on practical laser welding techniques

ABOUT WELDING COORDINATORS

Scan to download the SAIW Course Prospectus App.

COURSE INFORMATION

Welding coordinators are integral to the field of welding, playing a pivotal role in ensuring the quality, safety, and efficiency of welding operations. These professionals are essential for organisations and projects of all sizes, as they oversee and manage various aspects of welding activities. At the Southern African Institute of Welding (SAIW), we recognise the significance of these roles and offer specialised training programmes to equip individuals with the knowledge and skills necessary for their success.

Welding coordinators are responsible for orchestrating and managing welding operations at a higher level. They ensure that welding activities adhere to international standards and codes, coordinate multiple projects or departments, and oversee the certification of welders and welding procedures. Through SAIW's courses, such as those aligned with the International Institute of Welding's (IIW) qualifications, individuals can become proficient Practitioners (IWP), Specialists (IWS), or Technologists (IWT), depending on their career goals and the scope of their responsibilities. These qualifications provide a structured pathway for welding professionals to advance their careers and make significant contributions to their organisations.

By choosing SAIW as your training partner, you gain access to a wealth of expertise and resources in the field of welding coordination. Our programmes are designed to meet the industry's evolving demands. Our experienced instructors are committed to providing comprehensive training that aligns with international best practices.

Join us at SAIW and embark on a journey to become a respected and capable leader in the world of welding coordination. Your skills and expertise will contribute to the safety and excellence of welding operations across various industries.

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT WELDING COORDINATORS

INTERNATIONAL WELDING PRACTITIONER (IWP)	An International Welding Practitioner (IWP) is typically an individual responsible for ensuring that welding operations are carried out safely, efficiently, and in compliance with international welding standards and codes. IWPs are trained to understand and apply welding processes, welding procedures, and quality control measures.	They play a key role in supervising welding activities and ensuring that welders adhere to established welding procedures and safety guidelines. IWPs can also be involved in coordinating welding activities within their organisations or projects, although their focus is primarily on the practical aspects of welding.
INTERNATIONAL WELDING SPECIALIST (IWS)	An International Welding Specialist (IWS) is a more advanced role that involves a deeper understanding of welding technologies, materials, and quality control. IWSs are often responsible for overseeing welding operations, conducting weld inspections, and ensuring compliance with welding standards and specifications.	They may take on leadership roles in managing welding teams, developing welding procedures, and addressing complex welding-related challenges. IWSs have a comprehensive knowledge of welding processes, materials, and advanced welding techniques.
INTERNATIONAL WELDING TECHNOLOGIST (IWT)	An International Welding Technologist (IWT) is a high-level welding professional who possesses advanced technical knowledge and expertise. IWTs are often responsible for managing and coordinating welding activities on a larger scale, such as within a company or on major projects.	They play a crucial role in developing and implementing welding procedures, conducting research and development related to welding, and ensuring that welding processes meet specific performance criteria and industry standards. IWTs may also be involved in training and certifying welders and welding personnel.

CAREER PROGRESSION

The IIW's IWP, IWS, and IWT courses provide a structured pathway for individuals to acquire the knowledge and skills needed to excel in welding coordination roles. These courses offer a progressive curriculum, allowing students to advance from the practitioner level (IWP) to specialist (IWS) and technologist (IWT) levels, depending on their career aspirations and responsibilities. These qualifications can lead to career growth and increased expertise in welding coordination within the welding industry.

Please refer to contacts on page 14 | www.saiw.co.za

INTERNATIONAL WELDING PRACTITIONER (IWP)

COURSE INFORMATION

ENTRY REQUIREMENTS

- ✓ A valid welder qualification certificate to weld in all positions without backing in at least one process, e.g. 6G (H-L045) pipe weld without backing, or horizontal and vertical groove weld without backing.
  Supporting document: Valid welder qualification record (proof of welding within the past 6month) in any welding process and material in 6g pipe or plate 4g and 3g welding without backing except aluminium where backing is allowed.
- ✓ **OR**
  National welder qualification: eg QCTO welder or Red Seal Welder certificate or equivalent within the same qualification ranges as No 1.
  Supporting documents: Welder trade certificate.
- ✓ **AND**
  The recommended minimum age of 20 years including 2 years working experience as plate or pipe welder.
  Supporting documents: CV / reference letter from current or previous employer.

COURSE OUTLINE

This course has both a theoretical and a class practical component and covers:

- ✓ Welding processes and equipment.
- ✓ Materials and their behaviour during welding, construction and design.
- ✓ Fabrication applications engineering.
- ✓ Welder qualification tests will be conducted on completion of the theory and practical training in the 6G positions and PF plate positions, in a choice of processes or materials.

Practical Welder training is carried out on an individual basis with the main processes being MMA, MIG/MAG, FCAW, TIG and Oxy-Fuel welding. Forty (40) hours are reserved to broaden the student's knowledge and skill in other relevant materials within this main process. An additional twenty (20) hours shall be reserved to give the student basic understanding of the possibilities of other processes.

On completion of the course, students will have an understanding of:

- ✓ The characteristics and main components of the most common arc welding power sources
- ✓ The fundamentals of common and special welding processes and their applications
- ✓ Consumables used in the different processes
- ✓ Joint designs and weld configurations for specific materials, thicknesses, accessibility, different loadings and allowable tolerances
- ✓ Basic metallurgy of steels, testing of materials and heat treatments
- ✓ Defects encountered with the various welding processes
- ✓ And more – see dedicated course brochure for additional details

Please refer to contacts on page 14 | www.saiw.co.za

INTERNATIONAL WELDING PRACTITIONER (IWP)

The Course Is Intended For

Welders who wish to improve their welding skills and knowledge to enable them to take on welding supervision tasks and positions.

INTERNATIONAL WELDING TECHNOLOGIST (IWT)

COURSE INFORMATION

ENTRY REQUIREMENTS

- ✓ Matric / FET from a school, college, vocational school or technical institute,
  AND
  Education in a Science, Technology and Mathematics discipline that includes at least Mathematics, Physics and Chemistry
  OR
- ✓ Matric / FET as above, with Mathematics but without Physics and Chemistry, must have at least 2 years' experience in metalworking or welding within the last 5 years
  OR
- ✓ Matric / FET without STM. Must have at least 5 years' experience in metalworking

COURSE OUTLINE

PRACTICAL

- ✓ The practical training component of the course is not intended to bring the skill of trainees to a specific competency level but is aimed at ensuring they are exposed to a number of different processes and are familiar with the reasons for typical defects arising during welding
- ✓ Exemption is possible from the practical training module subject to a suitable CV showing experience with welding processes and is at the discretion of the Approved Training Body

THEORY

- ✓ Welding Processes and Equipment including advanced welding processes
- ✓ Materials and their behaviour during welding including advanced materials
- ✓ Construction and Design of welded fabrications
- ✓ Fabrications, Applications Engineering covering welding standards & their use

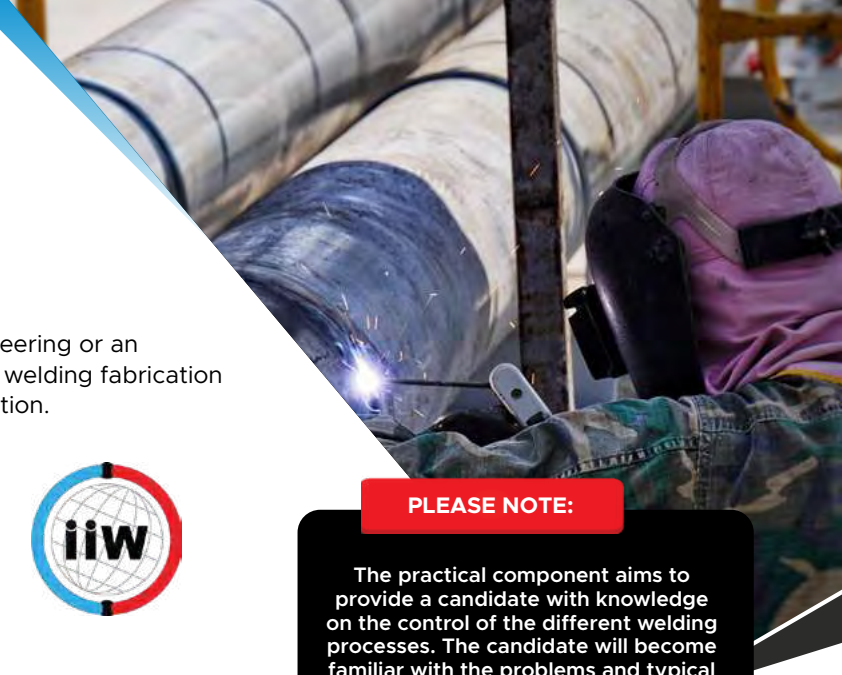

The International Welding Technologist (IWT) course is aimed at equipping personnel with the necessary skills and technical knowledge for the planning, executing, supervising and testing of the tasks and responsibilities in welding fabrication.

Engineering personnel intending to pursue a career in welding fabrication should apply for this course. It is suitable for engineers working on site and in fabrication workshops, in manufacturing, EPCM companies and end users. The qualification is referenced as suitable for employees with welding coordination responsibilities in ISO 3834 and ISO 14731 standards addressing welding.

It is also an excellent qualification for Welding Coordination Personnel with the responsibility for confirming the acceptability of welding procedures used in welded fabrications.

Please refer to contacts on page 14 | www.saiw.co.za

INTERNATIONAL WELDING TECHNOLOGIST (IWT)

The Course Is Intended For

Engineering personnel with a National diploma in engineering or an equivalent qualification, intending to pursue a career in welding fabrication and for engineers working in site and workshop fabrication.

COURSE DURATION		
	Practical	5 days
	Theory	37 days
	Exams	16 hours

PLEASE NOTE:

The practical component aims to provide a candidate with knowledge on the control of the different welding processes. The candidate will become familiar with the problems and typical defects associated with incorrect use of the different welding methods.

Exemption is available from the practical training module on application with a suitable CV showing experience with all the welding processes, subject to the discretion of the Approved Training Body.

ABOUT WELDING INSPECTORS

COURSE INFORMATION

Welding inspectors are the guardians of quality and safety in the welding industry. Their role is pivotal in ensuring that welds meet stringent standards, codes, and specifications, ultimately guaranteeing the integrity of welded structures and components.

At the SAIW, we recognise the critical importance of welding inspectors and offer comprehensive training programmes that empower individuals to become qualified Welding and Fabrication Inspectors at both Level 1 and Level 2.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT
WELDING INSPECTORS

LEVEL 1 AND LEVEL 2 CERTIFICATION

Our Welding and Fabrication Inspector courses are designed to provide in-depth knowledge and hands-on training to individuals aspiring to become proficient inspectors. These programmes cover a wide range of topics, including welding processes, codes and standards, defect identification, inspection techniques, and quality control. Upon successful completion of these courses, individuals can earn internationally recognised certifications, making them well-prepared to take on the responsibilities of welding inspection roles in various industries.

IWIP-B + ASME IX + AWS D1.1
= Welding and Fabrication Inspector Level 1

SAQCC COMPETENT PERSONS (CP) AND INSPECTOR OF PRESSURE EQUIPMENT (IPE)

In addition to IIW certifications, SAIW offers training and preparation for the South African Qualification & Certification Committee (SAQCC) Competent Persons (CP) and Inspector of Pressure Equipment (IPE) certifications. These credentials are crucial for individuals seeking to specialise in the inspection of pressure equipment and demonstrate their competence in ensuring the safe operation of pressure vessels, boilers, and related equipment. These certifications are highly regarded within South Africa's industrial landscape.

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT WELDING INSPECTORS

YOUR CAREER

By choosing the SAIW for your welding inspection training, you embark on a path to becoming a skilled and internationally recognised welding inspector. Your role will involve conducting critical inspections, ensuring compliance with industry standards, and contributing to the safety and quality of welding projects. Welding inspectors are in high demand globally, and our programmes are designed to equip you with the knowledge and skills needed to excel in this rewarding and vital profession. With experience, you can develop a solid technical base, which then allows you to move into other areas such as production management, quality assurance and control, risk management, third party inspection, and technical management.

ENROL IN AN SAIW COURSE AND INVEST IN YOUR FUTURE AS A WELDING INSPECTOR.

Your qualification will not only be a testament to your expertise but also a passport to a world of opportunities in the welding industry, both nationally and internationally.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

INTRODUCTION TO WELDING INSPECTION

A key step to becoming a Qualified Welding Inspector

The SAIW's INTRODUCTION TO WELDING INSPECTION COURSE gives candidates with no industry experience (or who do not meet the entry requirements to the SAIW Welding and Fabrication Inspector Level 1 i.e. Matric with 50% in Maths and Science), the ability to quickly familiarise themselves with welding quality control.

THE COURSES PROVIDES TRAINING ON:

1. An introduction to welding terminology
2. Description of common welding processes
3. Material science
4. Inspection techniques and defects
5. Welding and fabrication codes
6. Quality control documentation
7. Basic mathematics and science

SAIW WELDING AND FABRICATION INSPECTOR LEVEL 1

COURSE INFORMATION

The SAIW Level 1 course introduces candidates to welding processes, its applications, advantages and disadvantages as well as typical defects. It also introduces candidates to materials technology and the impact of welding on material properties. Visual inspection, quality assurance and quality control and welder code approval are covered in Level 1.

This course has been in existence for over 40 years and has been continually refined to meet industry requirements. The course has been refreshed and refined to ensure it is completely up to date and will deliver more comprehensive knowledge than ever before.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

SAIW WELDING AND FABRICATION INSPECTOR LEVEL 1

STUDENTS WILL COVER SOME OF THE FOLLOWING TOPICS:

1. ASME VIII visual inspection aspects
2. AWS D1.1 Welder Qualifications
3. ASME IX Welder Qualifications
4. ISO 9606 Welder qualification
5. Circular motion programming

Upon successful completion of the SAIW Welding and Fabrication Inspectors Level 1, the candidate will be issued with the SAIW Welding and Fabrication Inspectors Level 1 qualification certificate.

Once a student completes the Level 1 training, they may proceed to the SAIW Welding and Fabrication Inspectors Level 2 course. The progression will enable students to enhance their curriculum vitae.

SAIW WELDING AND FABRICATION INSPECTOR LEVEL 2

JOHANNESBURG | DURBAN | CAPE TOWN | SECUNDA

COURSE INFORMATION

The SAIW Welding Inspector training programmes are tailored to meet industry requirements for welding inspection personnel involved in the fabrication, petrochemical, refinery, process plant, power generation, construction and other industries.

The SAIW Welding and Fabrication Inspector Level 2 training programme is essential to complete the training and education requirements for most welding inspectors. It provides added knowledge of materials technology and the impact of welding on materials. Heat treatment requirements of the major codes of construction are covered as are destructive testing and non-destructive testing of welded joints. The course is essential for inspectors working in the fabrication, petrochemical, refinery, process plant, power generation, construction and other industries.

Inspectors with this qualification are prepared for approval for code compliance of welding procedures. With suitable experience the Inspector will also be prepared to take on inspection management responsibilities.

ENTRY REQUIREMENTS

- ✓ SAIW Welding & Fabrication Level 1 qualification

COURSE OUTLINE

WEEK 1
- ✓ Construction and Design
- ✓ Materials Technology II

WEEK 2
- ✓ Destructive Testing
- ✓ Non-Destructive Testing

WEEK 3
- ✓ Heat Treatment
- ✓ Inspection and Quality Assurance

WEEK 4
- ✓ Procedure Qualification
- ✓ Fabrication Applications Engineering
- ✓ Legal Knowledge

WEEK 5
- ✓ Examinations

SAIW WELDING AND FABRICATION INSPECTOR LEVEL 2

– Incorporating IIW IWI Standard

COURSE DURATION

20 days + 3 days revision + 2 days exams

PRICING (Including VAT)

Corporate Member	**R 55 803**
Non-Corporate Member	**R 60 226**

*Prices subject to change

Students having successfully completed the SAIW Welding and Fabrication Inspector Level 2 Inspector course may qualify for the internationally recognised IIW IWI Standard level diploma, subject to the requirements:

01 Both SAIW Level 1 and Level 2.

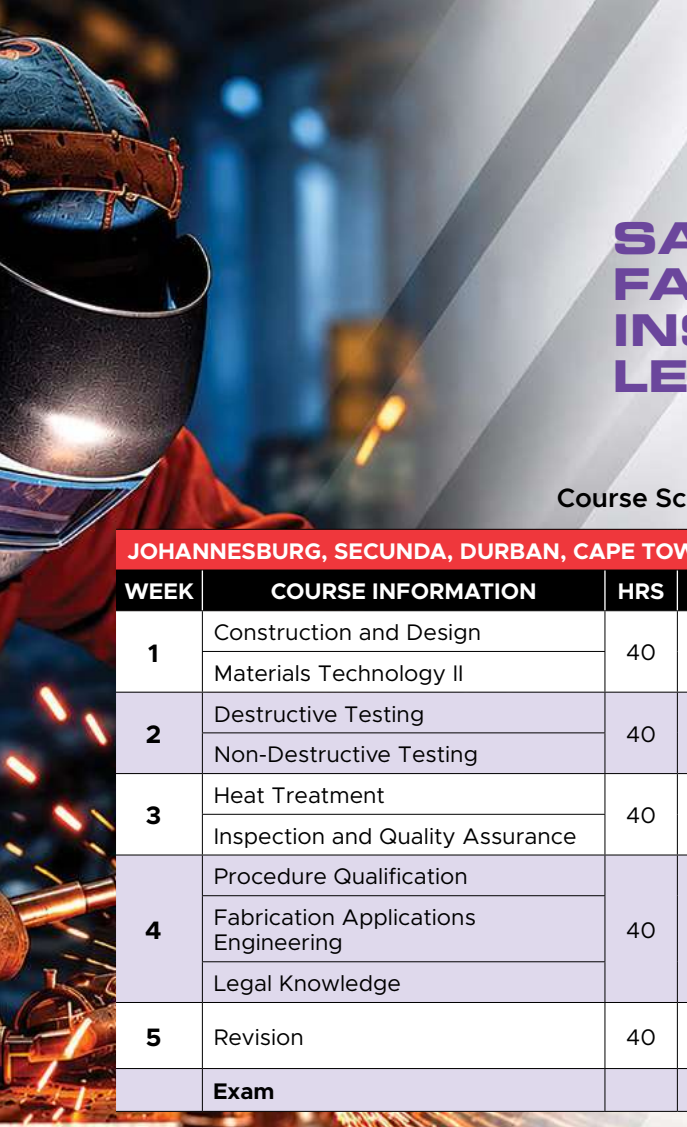

02 At least twenty years of age.

03 Have at least two years of relevant practical experience.

04 Students who qualified as SAIW Welding and Fabrication Inspector Level 2 before 2010 have to complete an extra 2 day module and exam in construction and design. (Details on application).

05 SAIW Welding and Fabrication Level 1 + Level 2 + Oral + 2 Years = IWIP-S.

Please refer to contacts on page 14 | www.saiw.co.za

INTERNATIONAL WELDING INSPECTION PERSONNEL – COMPREHENSIVE (IWIP-C)

TECHNOLOGY/INSPECTION

JOHANNESBURG | DURBAN | CAPE TOWN | SECUNDA

COURSE INFORMATION

The IWIP Comprehensive course is the most prestigious and the highest level of the IWIP courses. For candidates who have successfully completed the IWIP Standard course and are in possession of two years' Welding Inspection experience at the Standard level are eligible for the Comprehensive course.

On completing the course, inspectors will have extensive knowledge of welding and inspection theory and application. The course is presented in modular form similar to IWIP Standard and IWIP Basic i.e. there is a Technology module and an Inspection module that have to be successfully completed in order to attain the IWIP Comprehensive certificate.

Successful IWIP Comprehensive candidates will be able to manage all Inspection activities; supervise IWIP Basic and IWIP Standard personnel developing and then giving them appropriate (on-the job) instructions and act as technical experts for the inspection function.

People holding the IWT or IWE qualifications are exempt from the IWIP Comprehensive Technology module but are required to complete all the Inspection modules that is Basic Level, Standard Level and Comprehensive Level. SAIW will arrange appropriate courses subject to demand for IWE and IWT's.

ENTRY REQUIREMENTS

- ✓ IWI-S Level diploma plus 2 years experience at IWI-S Level
- ✓ Persons holding the IWE or IWT qualification are exempt from the technology component of IWI C and should contact SAIW training administration for details of a special course which covers only the inspection content of IWIP Basic, IWI Standard and IWI Comprehensive

COURSE OUTLINE

- ✓ Advanced Welding Processes
- ✓ Materials Technology
- ✓ Construction and Design
- ✓ Fabrication, Application, Engineering
- ✓ Testing of Welds
- ✓ QA/QC

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT COMPETENT PERSONS

THE SAIW COMPETENT PERSON (CP) OR INSPECTOR OF PRESSURISED EQUIPMENT (IPE) COURSES ARE IDEAL FOR PERSONS INTENDING TO WORK AS INSPECTORS FOR AN APPROVED INSPECTION AUTHORITY (AIA).

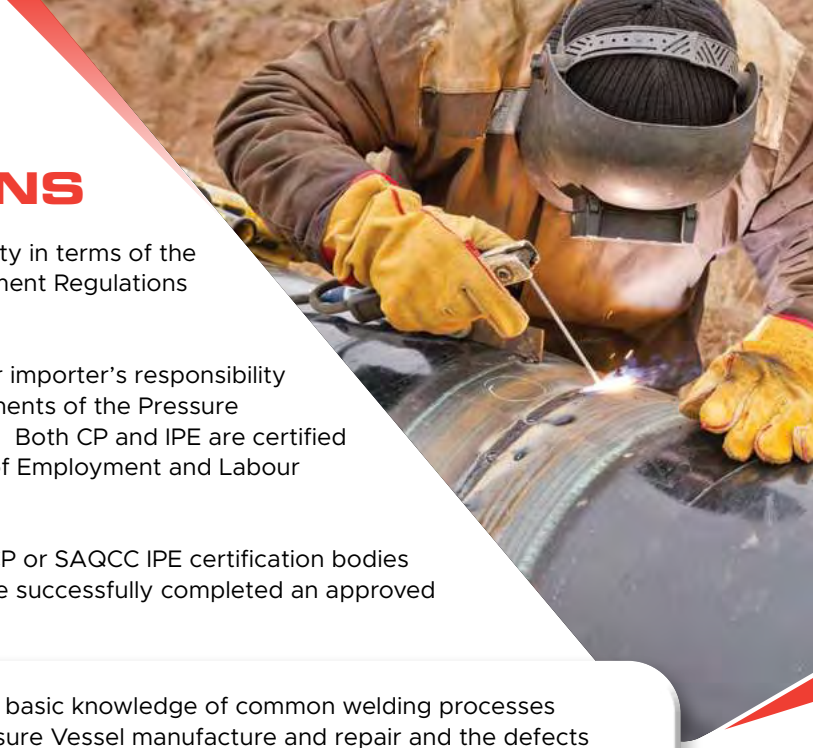

The CP courses are suitable for engineering personnel responsible for in-service inspection requirements, whilst the IPE courses are suitable for engineering personnel responsible for newly built or repaired equipment according to the Pressure Equipment Regulations (PER).

After completion of the courses at SAIW the individual will gain his required practical experience (10 vessels or 10 boilers) at an Authorised Inspection Authority (AIA).

The CP Steam Generator (CP-SG) and CP Pressure Vessel (CP-PV) are authorised inspectors of in-service equipment, whilst IPEs are authorised inspectors on newly built or repaired components for Pressure Equipment.

	COMPETENT PERSONS		INSPECTOR OF PRESSURISED EQUIPMENT
Theory +	CP-PV (3-week course)	CP-SG (2-week course)	Inspectors Level 1 (4-week course)
			Inspectors Level 2 (5-week course)
			RT Interpreters (2-week course)
			ASME (2-week course)
Experience	10 Vessels (AIA)	10 Vessels (AIA)	10 Vessels (AIA)
=	CV	CV	CV
Certified	Certified CP-PV	Certified CP-SG	Certified IPE

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT
COMPETENT PERSONS

The CP certification will ensure that the user's responsibility in terms of the in-service inspection requirements of the Pressure Equipment Regulations (PER) are appropriately managed.

The IPE certification will ensure that the local fabricator or importer's responsibility in terms of the newly built or repaired inspection requirements of the Pressure Equipment Regulations (PER) are appropriately managed. Both CP and IPE are certified personnel as required by the South African Department of Employment and Labour according to the Occupational Health and Safety Act.

CPs and IPEs are required to be certified by the SAQCC CP or SAQCC IPE certification bodies and it is an essential requirement that the candidates have successfully completed an approved training course for certification.

Scope CPs

Successful candidates will have a basic knowledge of common welding processes used in Steam Generator or Pressure Vessel manufacture and repair and the defects that may occur in original manufacture; have gained knowledge and understanding of the defects that arise in service and possible equipment failure mechanisms; have gained knowledge of the suitability of NDT test methods; understand the roles and responsibilities of the user, the AIA in-service and the competent person inspector in complying with the in-service inspection requirements of the PER and have sufficient technical knowledge to be able to perform in-service inspection.

Scope IPEs

Successful candidates will have extensive knowledge of common welding processes, weld metallurgy, heat treatment, NDT methods and welding coordination used in the fabrication and repair of steam generator and pressure vessels.

The candidate will be able to verify correct welders and welding procedures and be able to interpret and evaluate radiographs. The candidate will review data packs and sign them off on behalf of the AIA.

The IPE will understand the roles and responsibilities of the fabricator, the AIA for new and repaired pressure equipment. He will also liaise with the CP before the components are placed back in-service and the competent person inspector in complying with the in-service inspection requirements.

ENGINEERS' APPRECIATION OF WELDING

COURSE INFORMATION

In many companies a mechanical or electrical engineer, engineering superintendent or engineering supervisor is given the responsibility of managing 'the welding department'. Often this engineer will have absolutely no welding background and almost certainly his/her university or college study programme will have included no training in welding technology. If the engineer is lucky he/she may be assisted by an experienced welder or even a welding supervisor but this is not enough to accept the responsibilities assigned to his/her job.

For these reasons the course is one of the Institute's oldest courses and one of its most successful. The course was first developed in the early 1980s when it was derived from an in-company training course. It has been continuously updated to ensure industry relevance. Many engineers from all types of large companies and parastatals have attended the course as part of their professional development. It is, however, an extremely important course for engineers working in smaller companies where there is very little in-house back-up for the engineer who has to be a jack-of-all-trades.

The course introduces engineers to the complexities of welding, informing them of what can go wrong and the consequences of a failure including economic disaster. It covers the common welding processes and their applications. It describes the effect of welding on materials and welding defects and their causes. It looks at cost issues, the need for qualified welding procedures and how to go about specifying them. Importantly engineers are encouraged to bring their welding experiences and problems to the course for sharing with the class in discussion. The case history discussion period is held at the end of the course and is often one of the most helpful parts of the course for the engineer. It's very much about helping the engineer to know and be aware of when he/she needs to bring in specialist help.

ENTRY REQUIREMENTS

SAIW does not restrict access to this course but it is important to note that it is primarily aimed at plant, maintenance and project engineers, engineering superintendents, engineering technicians tasked with managing the welding function and senior quality assurance personnel.

COURSE OUTLINE

- ✓ Terms and definitions related to welding
- ✓ Introduction to welding processes
- ✓ Basic metallurgy
- ✓ Welding defects
- ✓ Introduction to non-destructive testing
- ✓ Inspection and quality assurance
- ✓ Codes of manufacture

Please refer to contacts on page 14 | www.saiw.co.za

ENGINEERS APPRECIATION OF WELDING

PLEASE NOTE:

The Appreciation of Welding course is designed to provide personnel with an overview of welding technology in order to understand welding better and make informed welding related decisions.

The course can be held in-company and anyone interested in running the course can contact elizabeth.shole@saiw.co.za.

ASME CODES OF CONSTRUCTION AND THE NATIONAL BOARD INSPECTION CODE

COURSE INFORMATION

This ASME Codes of Construction course is ideal for welding inspectors involved in boiler and/or pressure vessel fabrication, repair or modification. The course is mandatory for inspectors aiming for certification as an Inspector of Pressure Equipment (IPE) with the intention of working for an Approved Inspection Authority (AIA).

The syllabus includes requirements for welding, fabrication and inspection: design of vessels and boilers; allowable materials; strength calculations for openings; qualification of welders and welding procedures; inspection and tests; marking and reports; pressure relief devices; duties of inspectors; using the codes and calculations. NBIC is used for post construction activities in the installation, inspection, repair and alteration of pressure retaining equipment.

The course is suitable for project and maintenance engineers and engineering supervisors with responsibility for boilers and pressure vessels and as an introduction to the ASME Code.

Candidates should have a Grade 10 qualification as a minimum. Candidates should preferably have completed the SAIW level 2 welding inspector qualification prior to doing this course, which is a requirement for IPE certification.

ENTRY REQUIREMENTS

- ✓ There are no specific entry requirements for engineering personnel attending the course
- ✓ Welding fabrication inspectors should preferably attain the SAIW Level 2 qualification before attending this course

COURSE OUTLINE

The course content covers:

- ✓ ASME Section I
- ✓ ASME Section VIII Division I
- ✓ ASME Section IX
- ✓ National Board Inspection Code

Please refer to contacts on page 14 | www.saiw.co.za

ASME CODES OF CONSTRUCTION AND THE NATIONAL BOARD INSPECTION CODE

The Course Is intended for welding fabrication inspectors, engineers, technologists, technicians and supervisors who wish to improve their knowledge of these codes.

COURSE DURATION
10 days

PRICING (Including VAT)

Corporate Member	**R 30 056**
Non-Corporate Member	**R 32 438**

THE COURSE ADDRESSES THE REQUIREMENTS OF:

ASME Section 1
Rules of Construction for Power Boilers.

ASME Section VIII Division 1 –
Rules of Construction for Pressure Vessels.

ASME Section IX –
welding and brazing qualifications and NBIC – National Board Inspection Code.

Successful graduates will have an appreciation for the code requirements and be able to use the codes and interpret and apply the fabrication and inspection requirements in their daily work activities. The course is specifically designed to introduce students on the use of relevant code sections in a logical and methodical manner.

AWS D1.1 STEEL STRUCTURE

COURSE INFORMATION

AWS D1.1 code is widely used both locally and internationally for managing welding quality in structural steel constructions and buildings, bridges, draglines, oil production platforms, mining headgear, shaft steelwork, earthmoving and mining equipment, as well as power station structures.

ENTRY REQUIREMENTS

Personnel involved in the fabrication of steel structures including inspection, quality control and fabrication should attend this course. Engineering personnel wishing to improve their understanding of inspection and quality control during fabrication of steel structures are also encouraged to attend this course.

COURSE OUTLINE

This course provides an understanding of this welding fabrication code and covers the following aspects of the 2025 version of the code:

- ✓ Section 1 - General requirements related to welded steel structures
- ✓ Section 2 - Pre-qualified welding procedures
- ✓ Section 3 - Welding procedure and performance qualification
- ✓ Section 4 - Fabrication requirements
- ✓ Section 5 - Inspection requirements
- ✓ Section 6 - Practical exercises in the use of the code

Please refer to contacts on page 14 | www.saiw.co.za

HEAT TREATMENT PRACTITIONER

COURSE INFORMATION

Covers heat treatment requirements for the fabrication of pressure vessels, steam generators and process equipment.

The following fabrication codes are dealt with in this course:

✓ ASME ✓ EN13480 ✓ BS2633 ✓ EN13445 ✓ AWS D1.1

Heat Treatment Practitioner performing local heat treatment of welded fabrications on site, or in a workshop, using resistance heating, will benefit from this course. The course is also suitable for maintenance personnel who are responsible for supervising heat treatment operations. Candidates who preferably have a Grade 10 qualification as well as experience in engineering and/or metal working is recommended.

COURSE CONTENT

PRACTICAL

- ✓ Determining pre- and post-weld heat treatment requirements to codes and standards
- ✓ Determining heating and insulation band widths
- ✓ Determining heating configurations on nozzles
- ✓ Setting up equipment for weld heat treatments – thermocouples, heaters, insulation
- ✓ Operating heat treatment equipment

THEORY

- ✓ Basic metallurgy
- ✓ Heat treatment definitions
- ✓ Welding processes
- ✓ Welding effects on materials – why is heat treatment necessary?
- ✓ Heat treatment cycles, heating and cooling rates, soaking temperatures, soaking times
- ✓ Code and material specification requirements for welding
- ✓ Pre-heat, post-weld heat treatment, normalising, annealing, hydrogen removal
- ✓ Methods of heat treatment
- ✓ Equipment

Please refer to contacts on page 14 | www.saiw.co.za

PAINT INSPECTOR

COURSE INFORMATION

The Paint Inspectors (PI) course provides candidates with the basic knowledge of surface preparation and paint application to ensure engineering materials are suitably protected from environmental decay and/or corrosion, through the use of protective coatings.

Furthermore, the practical content of the course enables the candidate not only to assess the application process and newly applied protective layers, but also to identify coating damage on established installations.

Candidates who are involved in the surface preparation, paint application or corrosion protection industries, who want to further their career opportunities in the supervisory or coating evaluation facets of corrosion protection of engineering materials, may apply.

COURSE CONTENT

PRACTICAL

- ✓ Assessment of environmental conditions relating to coating application
- ✓ Perform inspections on newly prepared substrates
- ✓ Evaluate newly coated surfaces
- ✓ Test various aspects of an established coating system and identify typical coating damage and failures

THEORY

- ✓ Principles of corrosion
- ✓ Corrosion protection
- ✓ Selection of coating systems
- ✓ Surface preparation methods and applicable standards
- ✓ Paint constituents
- ✓ Application methods and applicable standards
- ✓ Paint specifications and datasheets
- ✓ Measurement and evaluation techniques and processes
- ✓ Site and shop applications
- ✓ Coating defects and failures
- ✓ Definitions of coating related terms

WELDING SYMBOLS

COURSE INFORMATION

Welding symbols are used as a pictorial language to convey weld requirements. The weld symbol conveys to the fabricator the position of welds, type of joint to be used, the size of the weld and the amount of weld metal to be deposited.

Welders that work with fabrication drawings must be able to interpret welding symbols to prepare the joint and apply a weld that meets the specifications. Welding inspectors must be able to read and interpret welding plans.

The welding symbol course provides a detailed review of the use of welding symbols in the fabrication environment.

The course covers the use of the European system for welding symbols (ISO 2553) as well as the use of the American system (AWS A2.4).

The course will also deal with the difficulties encountered in engineering design and fabrication workshops with the use of two different systems. Concepts covered in the course include, joint types and weld types, basic joint geometry, key terms, and basic rules of welding symbols and non-destructive testing symbols.

The course covers all types of welds including groove welds, fillet welds, plug and slot welds, spot and projection welds, and stud, seam, surfacing, and edge welds.

This course is ideal for all fabrication personnel including welding supervisors, quality controllers and welding inspectors. The course is also ideal for personnel involved in engineering design as well as draughting and detailing personnel.

WELD QUALITY MANAGEMENT AND WELDING COORDINATION

ISO 3834 AND ISO 14731

COURSE INFORMATION

Manufacturing processes such as fusion welding are widely used to produce many products, and for some companies, these are the key production features.

Products may range from simple to complex. Examples include pressure vessels, domestic and agricultural equipment, cranes, bridges, transport vehicles and other items. These processes exert a profound influence on the cost of manufacture and on the quality of the product.

It is therefore important to ensure that these processes are carried out in the most effective way and that appropriate control is exercised over all aspects of the operation.

The ISO 3834 Quality Management System will be consulted to clearly define all the welding related aspects and how to manage them on a day to day basis.

The course is aimed at assisting those in the Welding Coordination teams to implement and manage ISO 3834 as well as to familiarise them with their roles as stated in the ISO 14731 Standard.

SAIW / ISO 3834 certification is vital for successful mining.

By using SAIW / IIW ISO 3834 certified suppliers for your mining operations, you'll ensure the quality of welded fabrications improve safety on the mine and minimize costly downtime as well.

Since 2008, the Southern African Institute of Welding (SAIW) in association with the leading global authority on welding The International Institute of Welding (IIW) has been ensuring and verifying compliance with international ISO 3834 standards.

SAIW / IIW ISO 3834 Certification is good for mining.

ABOUT NON-DESTRUCTIVE TESTING (NDT)

COURSE INFORMATION

Non-Destructive Testing (NDT) refers to the testing of material and components without inhibiting its further usefulness. Applied scientific principles such as electromagnetic induction, magnetism, capillary action, mechanical vibration, electromagnetic waves, etc. are utilised to identify and characterise discontinuities within tested samples or areas of interest.

Training for NDT is provided by the SAIW in compliance with the ISO/TS 25108 in accordance with the syllabus provided in ISO/TS 25107 (ANSI/ASNT CP 105 as well as IAEA Tecdoc 628 are also incorporated) and recognised by an ISO/IEC 17024 accredited Personnel Certification Body (PCB) under the scope of ISO 9712, i.e. SAIW Certification PCB, which operates the SAIW Certification NDT Scheme.

The SAIW Certification NDT scheme is the very first NDT qualification and certification scheme developed 'in Africa by Africans for Africans'.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

ABOUT NON-DESTRUCTIVE TESTING (NDT)

TRAINING IS SECTOR SPECIFIC AND CAN BE SUBDIVIDED INTO THE FOLLOWING MAIN SECTIONS:

1. Terminology and history
2. Physical principles
3. Product technology and method capabilities
4. Equipment
5. Testing information
6. Testing process
7. Interpretation / evaluation and reporting
8. Assessment
6. Quality Aspects
10. Developments

Assessment quality aspects and developments training, qualification and certification is subdivided into three levels as stipulated by ISO 9712 new issue published in 2021

Level 1

An individual certified to **Level 1** has demonstrated competence to carry out NDT according to written instructions and under the supervision of Level 2 or Level 3 personnel. Level 1 personnel may be authorised to perform the following in accordance with NDT instructions: set up NDT equipment; perform the tests; record and classify the results of the tests according to written criteria; report the results.

Level 2

Level 2 personnel may be authorised by the employer to perform certain tasks which include: select the NDT technique for the testing method to be used; define the limitations of application of the testing method; translate NDT codes, standards, specifications, and procedures into NDT instructions adapted to the actual working conditions; set up and verify equipment settings; perform and supervise tests; provide guidance for personnel at or below Level 2; report the results of NDT.

Level 3

Level 3 personnel may be authorised to perform certain tasks which include: assume full responsibility for a test facility or examination centre and staff; interpret standards, codes, specifications, and procedures; carry out and supervise all tasks at all levels; provide guidance for NDT personnel at all levels.

Please refer to contacts on page 14 | www.saiw.co.za

UNLOCKING YOUR PATH TO NDT SUCCESS

THE ULTIMATE COURSE ORDER GUIDE

To embark on a successful career in NDT, it's crucial to follow a well-structured path.

THE CORRECT ORDER OF SAIW NDT COURSES CAN MAKE ALL THE DIFFERENCE TO YOUR JOURNEY
(see next page).

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

UNLOCKING YOUR PATH TO NDT SUCCESS

THE ULTIMATE COURSE ORDER GUIDE

Level 1

Liquid Penetrant Testing (PT) Course	Start with PT, an excellent introductory course that teaches you how to detect surface defects using liquid penetrants.
Magnetic Particle Testing (MT) Course	Next, delve into MT, where you'll learn to identify surface and near-surface flaws using magnetic fields.
Visual Testing (VT) Course	VT enhances your visual inspection skills, a fundamental ability in NDT.
Radiographic Testing (RT) Course including RT Safety	Radiographic testing teaches you to use X-rays and gamma rays to inspect materials. Safety is paramount.
Ultrasonic Testing (UT) WT	UT introduces you to the versatile world of ultrasonic testing, which is invaluable in many industries.
Ultrasonic Testing (UT)	Build on your UT knowledge to become proficient in this widely-used NDT technique.
Eddy Current	Explore Eddy Current testing, which is especially beneficial in the aerospace industry.

THESE LEVELS REPRESENT OPPORTUNITIES FOR ADVANCED TRAINING AND SPECIALISATION, INCLUDING BECOMING A WELDING INSPECTOR.

Overall, NDT offers a promising career with above-average pay, global opportunities, and room for growth. Those with NDT expertise have a unique passion for precision and are committed to doing things right. As you progress through these courses and levels, you'll gain the skills and knowledge necessary to become an indispensable part of the industries that rely on NDT for quality assurance including the power generation, petrochemical and mining sectors.

REMEMBER! ***Your NDT journey is a stepping stone to success, with each course adding to your expertise and career prospects.***

Please refer to contacts on page 14 | www.saiw.co.za

WHAT YOU NEED TO BUILD YOUR CAREER IN NON-DESTRUCTIVE TESTING

1 You need to be

ANALYTICAL
INTELLIGENT
HIGH LEVEL
ATTENTION
TO DETAIL

If you're one of the few people who're good at science & math, and have an enquiring mind, becoming an NDT professional will give you the chance of making a valuable future.

2 Consider yourself

INQUISITIVE
PERSISTENT
INTUITIVE

Being persistent and inquisitive, with a problem-solving attitude, studying SAIW's NDT courses will be your most flexible start to a better future.

3 You must be

AMBITIOUS
MOTIVATED
KEEN

If you're ambitious & motivated, contact the SAIW or visit www.saiw.co.za OR Call 011-298 2100 to enquire about our NDT courses.

4 THEN

You will be able to
EARN WHILE YOU LEARN

Studying NDT through SAIW means you'll be able to move through all the NDT levels at your own pace and as you can afford to. You'll also be able to earn while you learn, continuing to study as it suits you.

SAIW provides training programmes, consultancy and industry support services to the metal industries in South Africa. The SAIW is active throughout Southern Africa, the Indian Ocean Islands and the Middle East. SAIW qualifications & certifications are regarded as the industry standard in South Africa and enjoy international recognition

Non-Destructive Testing (NDT) is the testing of material or manufactured components without destroying their usefulness. Applying scientific techniques such as electromagnetic induction, magnetism, capillary action, mechanical vibration or electromagnetic waves, and other testing techniques, to identify potential flaws or failures within supplied samples.

SAIW
Southern African Institute of Welding

Call 011-298 2100 or visit www.saiw.co.za

INTRODUCTION TO NON-DESTRUCTIVE TESTING (NDT)

NDT stands at the forefront of modern scientific evaluation, enabling the examination of materials and components without compromising their integrity or future usability. This field represents a marriage of applied scientific principles that encompass a diverse array of techniques, including electromagnetic induction, magnetism, capillary action, mechanical vibration, electromagnetic waves, and more. These techniques are harnessed to meticulously uncover, characterise, and comprehend discontinuities present within the tested samples or areas of interest.

NDT is more than just a method; it is a commitment to the pursuit of safety, quality, and reliability across a multitude of industries.

It is the means by which hidden flaws are unveiled, structural integrity is assured, and material performance is scrutinised without the need for destructive testing methods. As we delve deeper into this prospectus, we invite you to explore the captivating world of NDT, where science, technology, and innovation converge to ensure the continued success and safety of our modern world.

Please refer to contacts on page 14 | www.saiw.co.za

TRAINING:
NDT ACCESS CONDITIONS

LEVEL 1: MT, VT, PT	Direct access to the course shall be granted if the candidate has passed both mathematics and science in Grade 10 (Proof of Grade 10 – or equivalent such as N1; certificate is required).
LEVEL 1: UT, RT, ECT	Please note that RT Safety is mandatory for access to an RT 1 course and no RT 1 certificate shall be issued unless a RT Safety certificate in accordance with DOH and issued by SAINT Professional Body can be shown. Direct access to the course shall be granted if the candidate has passed both mathematics and science in Grade 12 (Proof of Grade 12 – or equivalent such as N3 certificate is required). Alternatively, the candidate shall be required to pass a Proficiency Exam for surface methods, prior to being eligible to sit the applicable NDT course. Please note that the Proficiency test is free of charge and only assesses the basic skills relating to mathematics, science, comprehension and communication capabilities required within the applicable NDT method. The pass mark for the Proficiency test is 70%.
LEVEL 2: All Methods	Candidate shall be qualified i.e. have received training in accordance with ISO9712 requirements and have passed the Level 1 qualification examinations (certified is preferred) as a Level 1 NDT Technician in the applicable method and sector. Access to advanced / derived techniques requires a valid Level 2 certificate in the relevant method. **DIRECT ACCESS TO LEVEL 2:** Candidate shall have passed both mathematics and science at Grade 12 level (Equivalent to N3 - Proof of Grade 12 certificate is required) and have applicable tertiary qualification(s) and/or relevant NDT experience. Combination of Level 1 and Level 2 Training hours in accordance with an approved syllabus and training programme as per SAIW Certification NDT Scheme requirements and based on Certification body approval. The Level 1 qualification examinations shall also have been successfully passed.
LEVEL 3: All Methods	Candidate shall be qualified i.e. received training in accordance with ISO9712 requirements and have passed the Level 2 qualification examinations (certified is preferred) as a Level 2 NDT Technician in the applicable method and sector, appropriate tertiary qualifications (relevant to the NDT method - chemistry, mathematics or physics; and/or to the product or industry sector - chemistry, metallurgy, engineering etc.) are advantageous. All candidates for Level 3 Certification in any NDT method shall have successfully completed the Level 2 Practical exam. (If not certified as Level 2, the practical examination shall have been passed within 1 year from date of writing the Level 3 main method examination). Valid Level 2 Certificate in the applicable method and sector is mandatory when equipment operation or accepting tested components are required. **DIRECT ACCESS TO LEVEL 3:** Combination of Level 1, 2 and 3 Training hours in accordance with an approved syllabus and training program as per ISO 9712 and SAIW Certification NDT Scheme requirements and based on Certification body verification. The Level 2 qualification examinations shall also have been successfully passed. No reduction in requirements for industrial experience. Suitable tertiary qualifications (relevant to the NDT method - chemistry, mathematics or physics; and / or to the product or industry sector - chemistry, metallurgy, engineering etc.) are mandatory.

Please refer to contacts on page 14 | www.saiw.co.za

Please refer to contacts on page 14 | www.saiw.co.za

PENETRANT TESTING

COURSE INFORMATION

Penetrant Testing (PT), also known as Liquid Penetrant Testing, is a highly versatile surface-based NDT method. This technique employs a liquid containing a coloured dye, enhancing its visibility, to infiltrate and fill any open voids on the surface through capillary action. Once the excess penetrant is meticulously removed from the surface, a developer substance is applied. This developer acts as a contrasting medium, facilitating the migration of the penetrant from within the defects. Consequently, any discontinuities or flaws become prominently visible against the contrasting background, typically a white powder.

One of the remarkable attributes of PT is its applicability across a wide range of materials, provided that the discontinuity of interest is accessible from the surface. If you possess an affinity for chemistry, particularly the interplay of liquids, and find fascination in precision work that goes beyond swimming or indulging in the occasional beverage, then Penetrant Testing offers a fulfilling career path.

The effectiveness of PT is influenced by several factors, including the type of dye used (whether it's designed for normal light or backlight conditions, or both), the specific penetrant employed, the method used to remove excess penetrant, and the developer chosen for the testing process. Additionally, PT techniques must adapt to extreme temperatures, as variations in temperature can affect liquid properties such as viscosity and evaporation. Specialised techniques are employed in cases of excessively high or low temperatures to ensure accurate and reliable results.

Embarking on a career in PT allows you to explore the fascinating intersection of chemistry, materials science, and meticulous precision, making it one of the fundamental and indispensable NDT methods in various industries.

Please refer to contacts on page 14 | www.saiw.co.za

PENETRANT TESTING

If you enjoyed chemistry at school and your interest in liquids exceeds that of swimming and the occasional beer, then we invite you to start your career in one of the most basic yet useful NDT methods. Inspection techniques depend on whether the dye used is under normal light or backlight conditions (or both), the type of penetrant, excess penetrant removal process as well as developer used during testing. Furthermore, since temperature has an effect on the liquid properties, such as viscosity and evaporation, special techniques are applicable at excessively high and low temperatures.

THE TRAINING COURSE IS BASED ON GENERAL THEORY AS WELL AS SECTOR SPECIFIC APPLICATIONS RELATING, BUT NOT LIMITED TO, THE FOLLOWING STANDARDS AND SPECIFICATIONS:

- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection A - Article 1 & 6
- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection B - Article 24
- ✓ ISO 3452 Part 1 PT – General Principles
- ✓ ISO 3452 Part 2 PT – Testing of penetrant materials
- ✓ ISO 3452 Part 3 PT – Reference test blocks
- ✓ ISO 3452 Part 4 PT – Equipment
- ✓ ISO 3452 Part 5 PT – Testing at temperatures > 50 °C
- ✓ ISO 3452 Part 6 PT – Testing at temperatures < 10 °C
- ✓ ISO 12706 PT – Vocabulary
- ✓ ISO 23277 PT – Acceptance Levels

Scan to download the SAIW Course Prospectus App.

MAGNETIC PARTICLE TESTING

COURSE INFORMATION

Magnetic Particle Testing (MT) is a surface and shallow subsurface NDT method that leverages the inherent magnetic properties of materials to uncover surface flaws and significant indications just beneath the surface. The material being tested must possess magnetic qualities, allowing magnetic fields to be either generated within or passed through it. Consequently, MT is primarily applicable to ferromagnetic materials, characterised by having a magnetic permeability significantly greater than 1.

If you have a keen interest in magnetism and are intrigued by the utilisation of magnetic fields to identify discontinuities within ferromagnetic materials, Magnetic Particle Testing is the ideal starting point for your NDT career journey.

The techniques employed in MT vary depending on several factors, including the type of current utilised for magnetisation, whether the excitation current is maintained during the application of magnetic particles, and the nature of the magnetic field generated – whether it is linear or circular. Additionally, the method description should encompass details about the specific type of magnetic particles employed to render the indications visible, further enhancing the precision and effectiveness of the testing process.

Embracing MT as your chosen NDT path will immerse you in the captivating realm of magnetism, offering a unique perspective on how magnetic fields are harnessed to detect flaws and discontinuities in ferromagnetic materials – a skill set highly sought after in various industries where material integrity and safety are paramount.

Please refer to contacts on page 14 | www.saiw.co.za

MAGNETIC PARTICLE TESTING

If you are interested in magnetism and would like to find out how magnetic fields are used to detect discontinuities in ferromagnetic material then Magnetic Particle Testing is the place to start your career in NDT. Inspection techniques depend on the type of current being used to magnetise the material, whether the excitation current is maintained during the application of magnetic particles or not as well as the nature of the magnetic field generated i.e. linear or circular. In addition the technique description should also refer to the type of magnetic particles used to make indications visible.

THE TRAINING COURSE IS BASED ON GENERAL THEORY AS WELL AS SECTOR SPECIFIC APPLICATIONS RELATING, BUT NOT LIMITED TO, THE FOLLOWING STANDARDS AND SPECIFICATIONS:

- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection A - Article 1 & 7
- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection B - Article 25
- ✓ ISO 9934 Part 1 MT – General Principles
- ✓ ISO 9934 Part 2 MT – Detection media
- ✓ ISO 9934 Part 3 MT – Equipment
- ✓ ISO 12707 MT - Vocabulary
- ✓ ISO 17638 MT – Welds
- ✓ ISO 4986 MT – Castings
- ✓ ISO 23278 MT – Acceptance Levels

VISUAL TESTING

COURSE INFORMATION

Visual Testing (VT) stands out as one of the simplest yet most widely employed NDT methods in use today. VT often takes precedence as the initial inspection step for any component or environment, as it necessitates direct observation of the area under scrutiny. This method primarily focuses on surface inspection, making it an essential tool in the NDT toolkit.

VT harnesses the power of visible light, falling within the 390 to 700 nm range of the electromagnetic spectrum, and its interaction with solid surfaces. This interaction allows for the detection of surface indications that are open and unobstructed, free from any foreign materials or debris. In essence, what is visible to the eye corresponds directly to what can be detected.

If your high school experiences with lenses and mirrors piqued your interest, or if the intrigue of lasers has captivated your imagination, then an exploration of the fundamental realm of NDT through Visual Testing is an invitation to embark on a journey that may transform you into the modern-day 'Sherlock Holmes' of visual inspection specialists – the most iconic of all times.

The VT Method encompasses three primary techniques, each tailored to the accessibility of the surface and the nature of the material being examined. These techniques include direct, indirect, and translucent methods, offering a versatile array of approaches to suit various testing scenarios.

Pursuing a course in VT not only introduces you to the foundational NDT method but also equips you with the skills and knowledge needed to meticulously examine and uncover hidden details, making it a vital discipline in ensuring the integrity and safety of critical components in numerous industries.

Please refer to contacts on page 14 | www.saiw.co.za

VISUAL TESTING

If you enjoyed working with lenses and mirrors in high school and if lasers fascinates you, then you are invited to attend a course in the most basic of all NDT methods and challenge you to become the next 'Sherlock Holmes' – certainly the most famous 'visual testing specialist' of all times.

The Visual Testing method can be divided into three main techniques depending on the access to the surface.

The techniques are direct, indirect and translucent and depend on the type of material to be tested.

THE TRAINING COURSE IS BASED ON GENERAL THEORY AS WELL AS SECTOR SPECIFIC APPLICATIONS RELATING, BUT NOT LIMITED TO, THE FOLLOWING STANDARDS AND SPECIFICATIONS:

- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection A - Article 1 & 9
- ✓ ISO 3058 VT – Low power magnifiers
- ✓ ISO 8785 VT – Geometrical product specifications
- ✓ ISO 13385 Part 1 VT – Geometrical product specifications : Callipers
- ✓ ISO 13385 Part 2 VT – Geometrical product specifications : Calliper depth gauges
- ✓ ISO 11971 VT – Castings
- ✓ ISO 17637 VT – Welds

Scan to download the SAIW Course Prospectus App.

RADIOGRAPHIC TESTING

COURSE INFORMATION

Radiographic Testing (RT) harnesses the power of electromagnetic waves, specifically X-rays within the 0.01 to 10 nanometre range or Gamma-rays with wavelengths below 0.01 nanometres. Within these ranges, electromagnetic waves can proficiently penetrate solid materials, enabling the creation of detailed images either on film or by using electromagnetic sensors, providing valuable insights into the material's composition and integrity.

RT excels as a volumetric testing method, capable of identifying discontinuities exceeding a 2% cross-sectional void or material change in relation to the actual beam orientation. The energy levels associated with these extremely short waves exceed 100 electron volts (eV), but they pose a potential risk due to ionising radiation. It's crucial for operators to undergo radiation safety training, as this form of radiation is imperceptible to the senses – unseen, unheard, unfelt, untasted, and unscented. The aim is to maintain ALARA (As Low As Reasonably Achievable) exposure levels to minimise potential harm.

If you have an affinity for photography and hold Superman as your favourite DC character, Radiographic Testing offers a unique opportunity to explore your interests while making a substantial contribution to industry safety. However, it's essential to note that a solid foundation in exponents and logarithms is essential for mastering the intricacies of this NDT method.

Radiographic techniques within RT are diverse, contingent upon the type of electromagnetic wave employed, the configuration of exposure, and the image formation. By delving into RT, you not only combine the art of imaging with the pursuit of safety but also play a pivotal role in ensuring the structural soundness of critical components across various industries.

Please refer to contacts on page 14 | www.saiw.co.za

RADIOGRAPHIC TESTING

THE TRAINING COURSE IS BASED ON GENERAL THEORY AS WELL AS SECTOR SPECIFIC APPLICATIONS RELATING, BUT NOT LIMITED TO, THE FOLLOWING STANDARDS AND SPECIFICATIONS:

- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection A - Article 1 & 2
- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection B - Article 22

ULTRASONIC TESTING

COURSE INFORMATION

Ultrasonic Testing (UT) is a powerful NDT method that relies on the mechanical vibration of sound waves in the ultrasonic range (frequencies greater than 20 kHz) to uncover volumetric discontinuities within solid materials. In UT, both compression and shear waves play a pivotal role in investigating the internal nature of components. The interaction of these waves with linear, planar, or volumetric anomalies, often referred to as 'vacancies,' enables the characterisation of any detected discontinuities.

The primary inspection medium in UT is the sound beam, and a profound understanding of its qualification (properties) and quantification (calibration) is crucial for accurately interpreting signal responses. If you're someone who enjoys playing pool, possesses a penchant for geometry and trigonometry, and relishes the challenge of deciphering complex structures, then embarking on an Ultrasonic Testing course is a transformative experience. It will revolutionise the way you perceive engineering materials and weldments, offering you a unique perspective into their internal composition.

Within UT, compression and shear waves applications having various angles and frequencies serve as the foundation for determining the techniques used. Additionally, the send-or-receive/send-and-receive capabilities of the sensors, along with scanning methodologies such as the tandem technique, are vital technique parameters. Mastering these parameters empowers you to not only detect defects but also to assess their size, orientation, and position accurately.

Delving into UT opens doors to a fascinating world where science, mathematics, and technology converge to ensure the safety and reliability of critical components in various industries. It's a discipline that empowers you to become a vital guardian of structural integrity, making it a rewarding and intellectually stimulating choice for those passionate about NDT.

ULTRASONIC TESTING

THE TRAINING COURSE IS BASED ON GENERAL THEORY AS WELL AS SECTOR SPECIFIC APPLICATIONS RELATING, BUT NOT LIMITED TO, THE FOLLOWING STANDARDS AND SPECIFICATIONS:

- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection A - Article 1, 4 & 5
- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection B - Article 23
- ✓ ISO 16810 UT – General Principles
- ✓ ISO 11666 UT – Acceptance Levels
- ✓ ISO 17640 UT – Techniques, Testing levels and assessment
- ✓ ISO 23279 UT – Characterisation of discontinuities in welds
- ✓ ISO 5577 UT – Vocabulary
- ✓ ISO 18175 UT – Performance characteristics (no electronic instruments)
- ✓ ISO 16827 UT – Characterisation and sizing of discontinuities
- ✓ ISO 16826 UT – Discontinuities perpendicular to the surface
- ✓ ISO 16811 UT – Sensitivity and range
- ✓ ISO 12710 UT – Evaluating electronic characteristics of UT instruments
- ✓ ISO 10375 UT – Characterisation of search unit and sound field
- ✓ ISO 7963 UT – Calibration block No 2
- ✓ ISO 4992 Parts 1 & 2 UT – Steel castings
- ✓ ISO 2400 UT – Calibration block No 1
- ✓ ISO 22232 Parts 1/3 UT – Equipment characterisation

Details of specific codes utilised in the limited (UT 1.WT) as well as derived or advanced techniques courses (UT 2.7; 2.8; 2.9; 2.10 and 2.11) can be found in the relevant training documents.

EDDY CURRENT TESTING

COURSE INFORMATION

Eddy Current Testing (ECT) is a highly effective electromagnetic testing method that leverages electromagnetic induction to detect and assess discontinuities in materials. A fundamental prerequisite for eddy current testing is that the material being examined, or in the case of paint thickness measurement, the substrate, must be electrically conductive.

ECT serves as a versatile testing method, offering both surface and subsurface inspection capabilities. The depth to which inspections can be carried out effectively hinges on several factors, including the frequency of the excitation current, the electrical conductivity, and the magnetic properties of the material under scrutiny. While this may seem complex, it all boils down to principles you may recall from your high school lessons on electrical transformers.

If the world of electromagnetic induction intrigues you, dust off your high school knowledge and embark on an ECT course. It's a journey that promises to deepen your understanding and expertise in this captivating field.

Eddy current testing techniques are adaptable, depending on the nature of the sample being tested, be it a flat surface, tube, bar, or more intricate shapes. The choice of probe is influenced by this, and it plays a pivotal role in the testing process. Additionally, the utilisation of multiple frequencies and inspection modes, such as absolute or differential, determines the specific multi-frequency and/or mode techniques used.

The presence of factors like magnetic saturation, weak magnetic alloys, shielding, or the focusing nature of the probe, as well as the capabilities of the display system, contribute to the comprehensive description of eddy current testing techniques. By delving into ECT, you're not only exploring the intriguing world of electromagnetic induction but also contributing to the safety and quality assurance of materials in various industries.

Please refer to contacts on page 14 | www.saiw.co.za

EDDY CURRENT TESTING

IF THIS SOUNDS LIKE A MOUTHFUL, THEN WE INVITE YOU TO DUST OFF YOUR HIGH SCHOOL KNOWLEDGE REGARDING ELECTRICAL TRANSFORMERS AND ATTEND AN ECT COURSE.

The techniques utilised in eddy current testing depends on the sample being tested, i.e. whether it is a surface, tube, bar or other more complex shapes since it dictates the type of probe to be used. Furthermore, the number of frequencies and the inspection mode(s), such as absolute or differential, determines the multi- frequency and / or mode technique description. The presence of magnetic saturation, weak magnetic alloys, shielding or focussing nature of the probe as well as the display capabilities extends the technique description.

THE TRAINING COURSE IS BASED ON GENERAL THEORY AS WELL AS SECTOR SPECIFIC APPLICATIONS RELATING, BUT NOT LIMITED TO, THE FOLLOWING STANDARDS AND SPECIFICATIONS:

- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection A - Article 1 & 8
- ✓ ASME Boiler & Pressure Vessel Code - Section V - Subsection B - Article 26
- ✓ ISO 15549 ECT – General principles
- ✓ ISO 15548 Part 1 ECT – Instrument Characteristics and verification
- ✓ ISO 15548 Part 2 ECT – Probe Characteristics and verification
- ✓ ISO 15548 Part 3 ECT – System Characteristics and verification
- ✓ ISO 17643 ECT – Welds
- ✓ ISO 2360 ECT - Non-Conductive coatings – Amplitude sensitive equipment
- ✓ ISO 21968 ECT - Non-Conductive coatings – Phase sensitive equipment
- ✓ ISO 12718 ECT - Vocabulary

AWARDS

OUTSTANDING PERFORMANCE ON SAIW COURSES

EACH YEAR THE SAIW PRESENTS THE FOLLOWING AWARDS

The Phil Santilhano Memorial Award

FOR THE TOP STUDENT ON EITHER THE WELDING INSPECTOR COURSES OR THE WELDING COORDINATION COURSES

The Presidents' Award for NDT

FOR THE TOP STUDENT ON NON-DESTRUCTIVE TESTING COURSES

Best Welding Coordinator Award

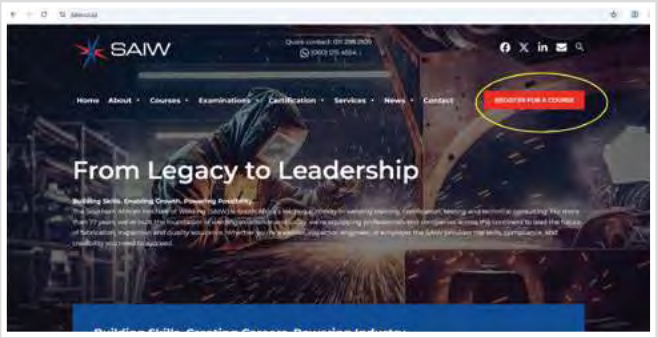

All students attending relevant courses are automatically considered for each of the SAIW awards, which are presented at the SAIW Annual Dinner.

SAIW

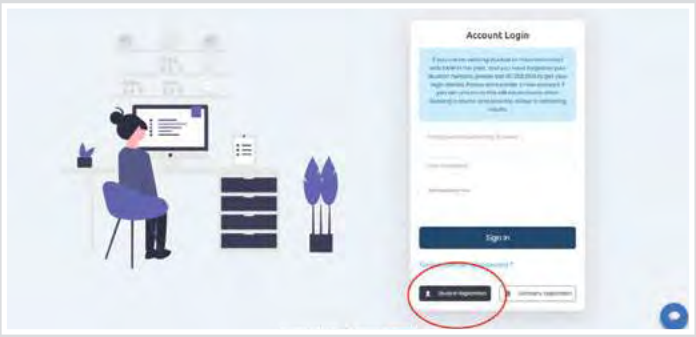

For more information about the awards please contact your course lecturer.

Please refer to contacts on page 16 | www.saiw.co.za

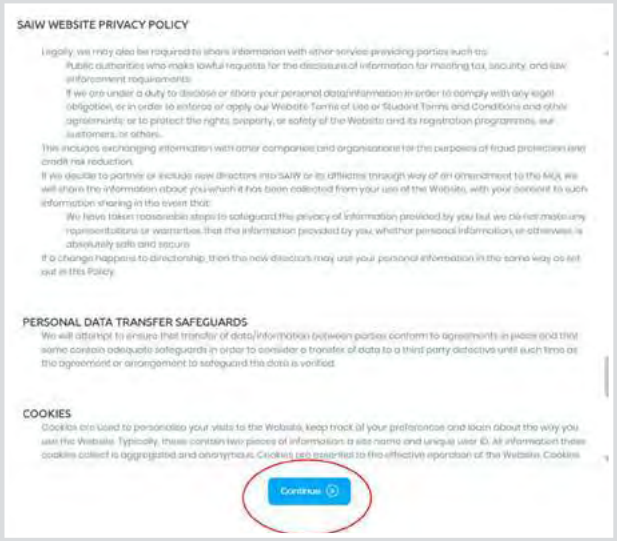

ONLINE SYSTEM

01 Go to www.saiw.co.za and click register for a course.

02 New students click student registration and complete the quick registration. Your Log in details will be sent via email.
Existing students log in with their existing credentials. You can reset your password by clicking forget password.

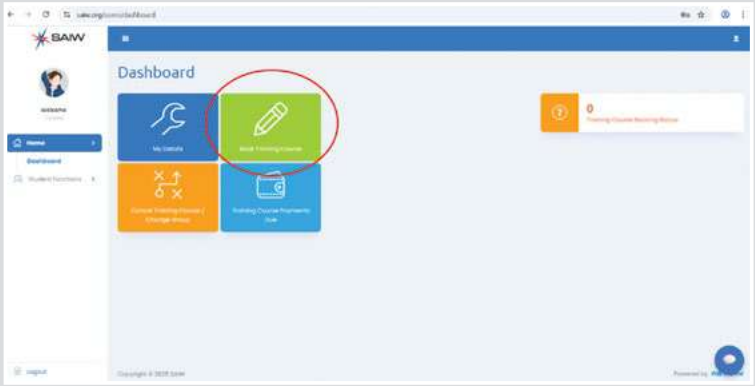

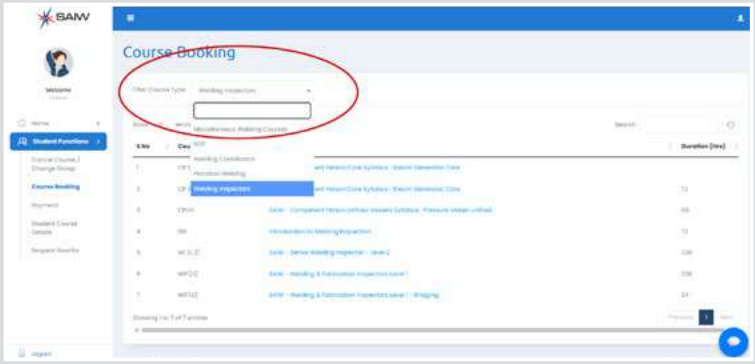

03 Click continue

Please refer to contacts on page 14 | www.saiw.co.za

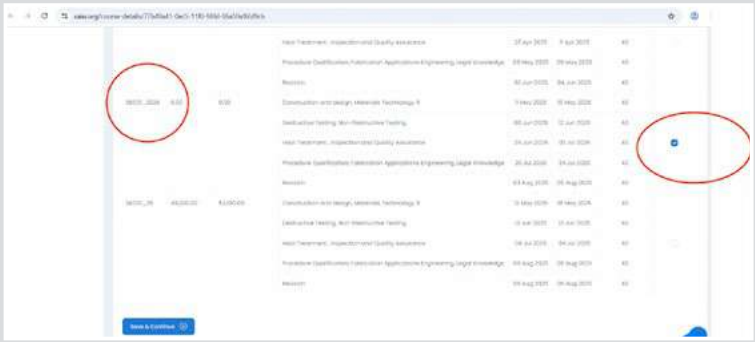

ONLINE SYSTEM (CONTINUED)

04 Click book for a course

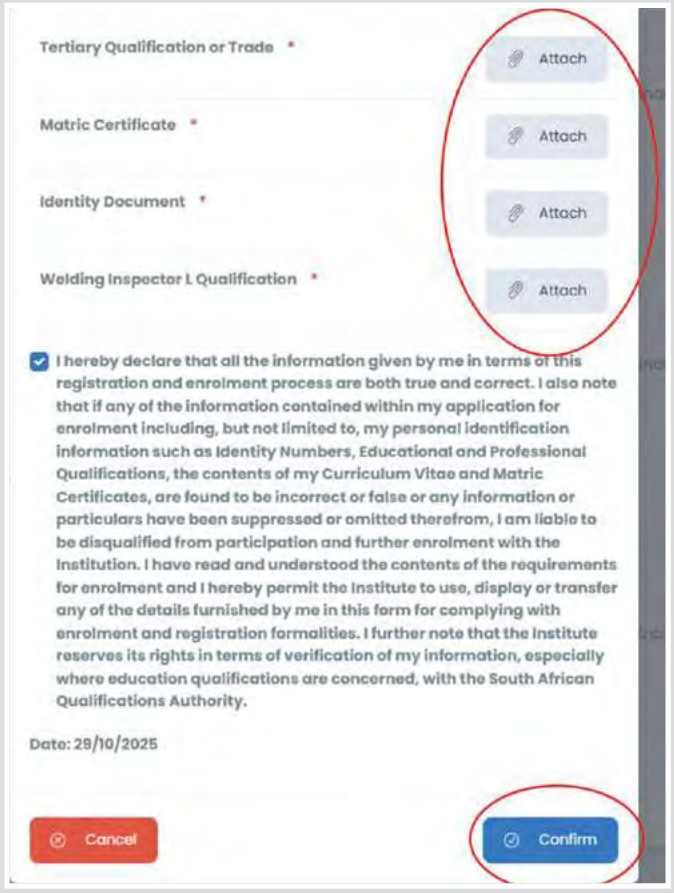

05 Select course type you wish to book for on the drop down menu

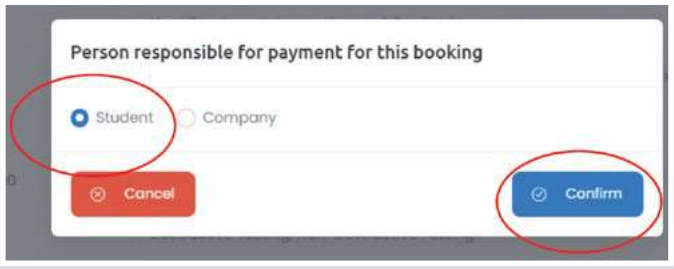

06 Select your preferred group, class, location and start date

Please refer to contacts on page 14 | www.saiw.co.za

ONLINE SYSTEM (CONTINUED)

07 Upload the required documents and click confirm.

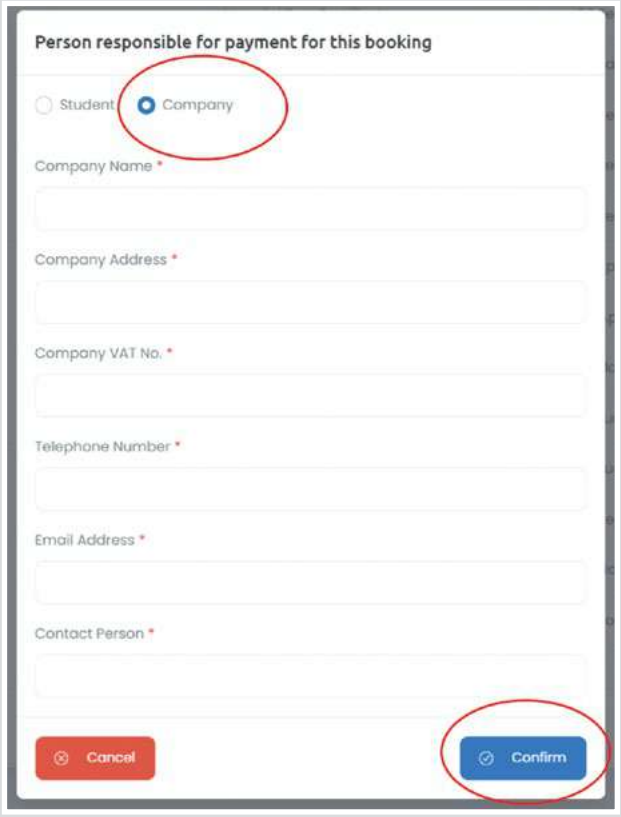

08 Click person responsible for payment of fees and click confirm.

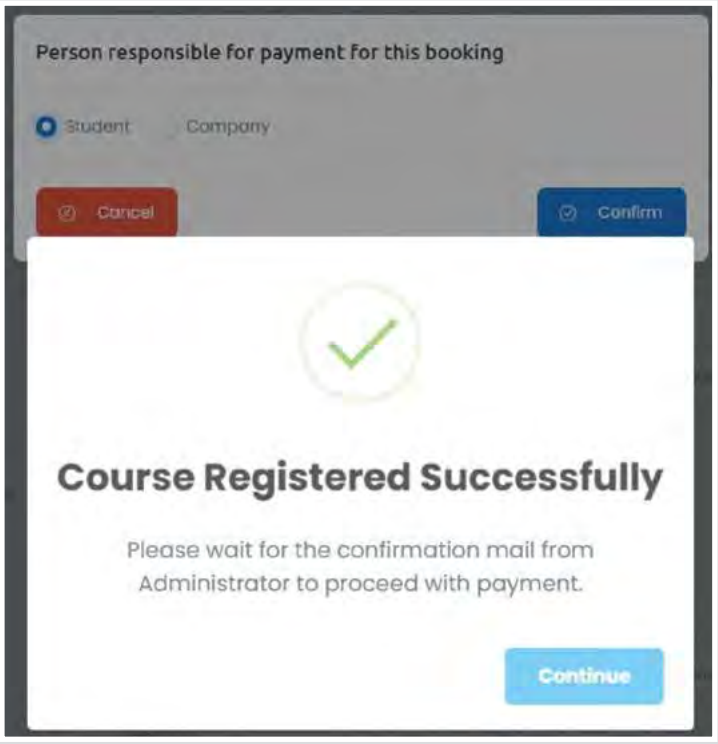

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

ONLINE SYSTEM (CONTINUED)

09 If a company is responsible for payment complete the required company information and confirm.

10 You have successfully registered. The request for booking will be sent to the SAIW administration offices. Once accepted you will receive a quote via email.

Please refer to contacts on page 14 | www.saiw.co.za

BOOKING PROCEDURE

- ✓ Please ensure that you comply with the course access conditions prior to enrolling for the course
- ✓ Refer to the access conditions throughout the prospectus
- ✓ Further information is available on the SAIW website: www.saiw.co.za
- ✓ Full payment is to be made prior to the commencement of the course and exam
- ✓ All prices indicate the combined total for both the training and initial qualification examination costs

Please contact SAIW at elizabeth.shole@saiw.co.za should you experience any difficulty with the self-help online registration.

ALL PRICES QUOTED INCLUDE VAT

PLEASE NOTE THAT

Once we have received the correct documents and payment has been confirmed, you will receive a Booking Confirmation Notice via email. This booking confirmation notice will include the date of the course, venue full address.

Please bring your booking confirmation on the first day of your course.

Your place on the course is not guaranteed unless you have the "Booking Confirmation Notice".

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

BOOKING PROCEDURE

DOCUMENTATION REQUIRED FOR COURSE ENROLMENT

1. Legible copy of highest academic qualifications (school, college, university, etc.) and / or pass mark in proficiency test (>70%).
2. Legible copy of ID or Passport.
3. Confirmation of the preceding Level qualification (training record and examination result letter) is required, if applicable.
4. CV (where applicable).

WHAT YOU NEED TO BRING ALONG

1. Copy of your ID or Passport.
2. Stationery, e.g. pen, pencil, note book, eraser and highlighter and scientific calculator.
3. A 100% attendance of the course is mandatory.

CANCELLATION OF TRAINING

1. The SAIW reserves the right to cancel the holding of a course at short notice, should student numbers not meet our minimum course requirements. Candidates shall be informed of the cancellation two weeks prior to the training start date and arrangements will be made to book the candidate on the next available course. Should the student/applicant decide the alternative arrangement is unsuitable, the full course fees will be reimbursed in these circumstances. Personal costs relating to accommodation and travelling cannot be claimed.
2. If the course booking is cancelled by the applicant prior to the training start date, a cancellation charge of 25% (plus VAT) of the course fees will be charged by the SAIW as an administration fee and the balance of the fees refunded to the applicant. In these circumstances only the balance of the course fees will be reimbursed and no personal costs relating to accommodation and travelling may be claimed by the applicant.
3. If a student has already attended any portion of the class or course and then decides not to continue, no refund will be granted. In such cases, the student may reschedule and attend the class at a later date, subject to availability and within the applicable rescheduling policy.

Please refer to contacts on page 14 | www.saiw.co.za

ALL RE-WRITE EXAMINATIONS
BOOKING PROCEDURES

Application Process

All documentation related to re-write examinations should be directed to the Examination & Qualification coordinator in the SAIW Certification Examination Department via email to ndtrewrite@saiw.co.za for NDT or weldtechrewrites@saiw.co.za for all other courses or by phone at 011 298 2128.

The following documents are required:

- ✓ The "Examination Application Form" must be completed in its entirety. Special attention must be given to ensuring accurate signatures and providing a valid email address. Candidates attending the training course are required to complete this form on the first day of the course.
  OR refer to page 114 for online application.
- ✓ A confirmation of full payment is mandatory for exam registration.
- ✓ For NDT Examinations, candidates must obtain a valid vision acuity certificate from a qualified optometrist within six months of the exam date.
- ✓ A legible copy of the candidate's ID or Passport is required for verification purposes.

We appreciate your co-operation and understanding of these policies. If you have any further inquiries or concerns, please do not hesitate to contact the Examination Department.

Full payment must be made prior to the commencement of the examination. **All prices quoted include VAT.**

WHAT YOU NEED TO BRING ALONG:

1. Copy of your ID or Passport.
2. Stationery, e.g. pen, pencil, note book, eraser and highlighter and scientific calculator.

DRESS CODE

NDT
Long pants, shirt and safety boots.

ANY OTHER COURSE
Long pants, shirt and closed shoes.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

CANCELLATION OF RE-WRITE EXAMINATION POLICY

If the minimum required number of students is not met, SAIW Certification retains the right to cancel a scheduled re-write exam on short notice.

Candidates will be duly informed of this cancellation at least two weeks prior to the re-write exam date. Alternate arrangements will be made to accommodate affected candidates in the next available re-write exam. Should the proposed alternative not be suitable for the student/applicant, a full reimbursement of the re-write exam fee will be issued.

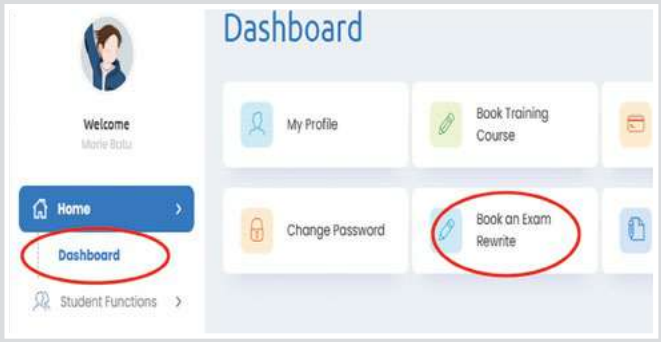

PLEASE NOTE

Personal expenses such as accommodation and travel costs cannot be claimed.

Less than 30 Days Notice	If a candidate cancels their re-write exam booking less than 30 (thirty) days prior to the exam date, a cancellation charge, equivalent to 25% of the full re-write exam cost, will be applicable.
30 Days or More Notice	If a candidate cancels their re-write exam booking 30 (thirty) days or more prior to the exam date, a 15% administration fee (plus VAT) based on the re-write exam fee will be charged. The remaining balance of the fee will be refunded to the applicant. It is important to note that only the balance of the re-write exam fee will be reimbursed; personal expenses related to accommodation and travel cannot be claimed.
Non attendance due to medical or work reasons	If an examination cannot be attended due to medical reasons or work reasons, a doctors' sick note or a letter from the work supervisor needs to be provided. In this case a postponement will be accepted with no cancellation charges applied.

Please refer to contacts on page 14 | www.saiw.co.za

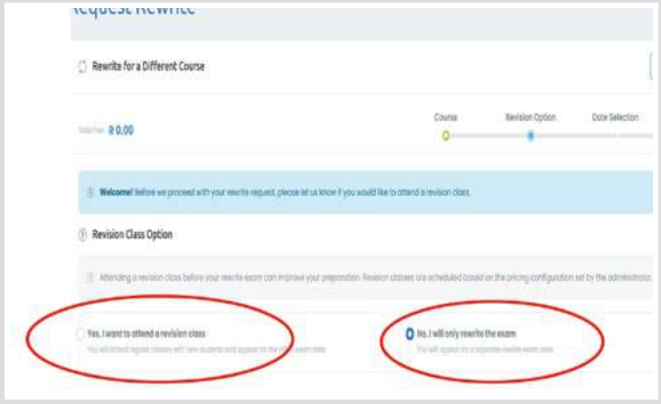

RE-WRITE BOOKING PROCEDURE

01 Login your student profile Login | SAIW Go on dashboard, click “book an exam rewrite’.

02 Select the course type and course you want to rewrite.

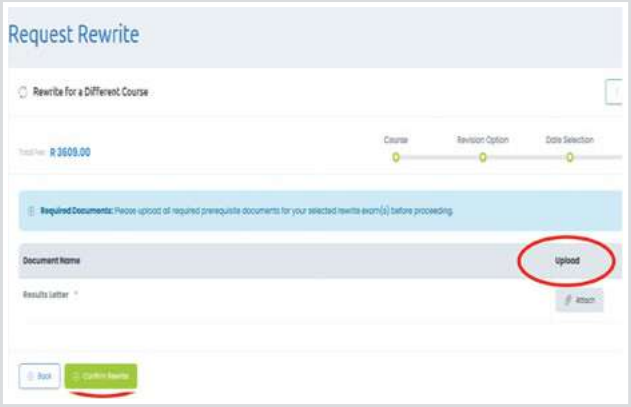

03 If you would like a revision class before your rewrite, click yes, otherwise click no.

04 Select Exam Dates: Choose the exam dates and venue for the modules you wish to rewrite. You can select more than one at a time. Then click continue.

Please refer to contacts on page 14 | www.saiw.co.za

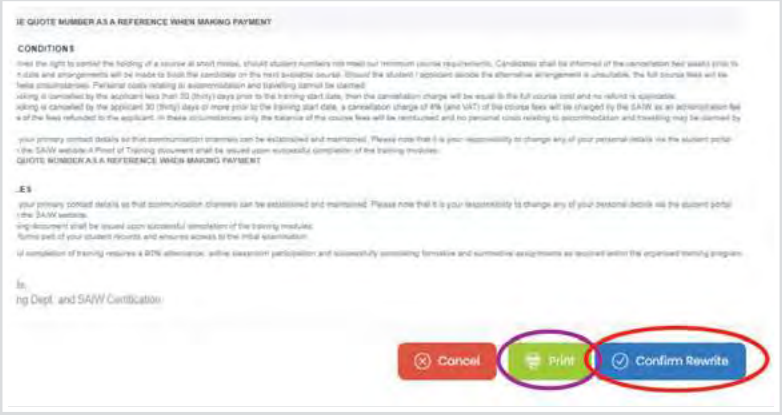

RE-WRITE BOOKING PROCEDURE (CONTINUED)

05 Upload all required prerequisite documents for your selected rewrite exam(s) before clicking “confirm rewrite”.

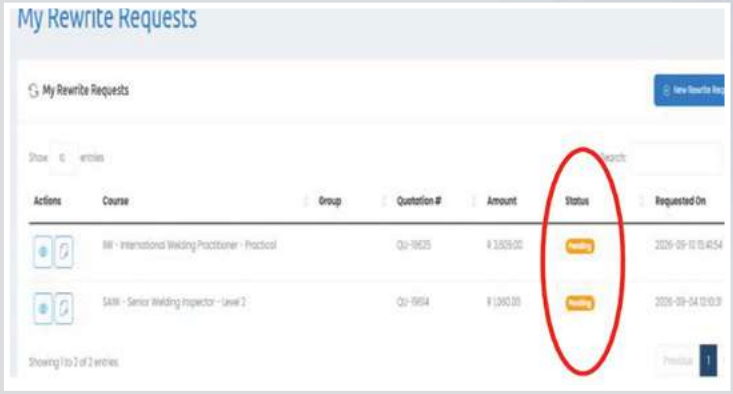

06 After confirmation, you will receive a quotation.

07 Choose print if you want a copy, otherwise click “confirm rewrite“ at the bottom of the quotation to finish.

Please refer to contacts on page 14 | www.saiw.co.za

RE-WRITE BOOKING PROCEDURE (CONTINUED)

08 Booking status will be “pending” until payment and proof of payment has been uploaded. Ensure POP is made before booking cut-off-date.

09 Go to payment to upload proof of payment. SAIW administrator will approve booking and a confirmation letter will be sent by email.

Scan to download the SAIW Course Prospectus App.

Please refer to contacts on page 14 | www.saiw.co.za

RE-WRITE EXAMINATIONS

JOHANNESBURG, DURBAN AND CAPE TOWN

Please note that the re-write examination schedule could be revised in line with the training schedule - please refer to the SAIW website for the latest version as well as related information.

PRICING (Including VAT)

Revision	**R 3 062** per day
Welding Coordinator	**R 1 134** per exam
Introduction to Welding Inspection	**R 454** per exam
SAIW Welding Fabrication Inspector Level 1 and Level 2	**R 1 134** per exam

CODE OF CONDUCT

FOR STUDENTS ATTENDING SAIW TRAINING PROGRAMMES AND EXAMINATIONS

STUDENTS ARE REQUIRED TO EXHIBIT GOOD BEHAVIOUR WITHIN THE SAIW CAMPUS AND RELATED VENUES

1. All students and staff members must be treated with respect.
2. Students are required to comply with any reasonable instruction given by an SAIW staff member.
3. Threatening or disruptive behaviour, harassment or other similar behaviour is unacceptable.
4. All students and staff members must be treated with respect.
5. Dishonesty or cheating in training tests or examinations are not tolerated.
6. At least 90% attendance of courses is mandatory.

Please refer to contacts on page 14 | www.saiw.co.za

CODE OF CONDUCT

FOR STUDENTS ATTENDING SAIW TRAINING PROGRAMMES AND EXAMINATIONS

Students are reminded that firearms and/or other dangerous weapons are not permitted within the SAIW campus.

Conditions of entering SAIW

- The SAIW reserves the right to search any person at any time and to inspect any containers, vehicles, etc. taken into or out of the SAIW premises
- No intoxicated person is permitted to enter the SAIW premises
- No explosives or firearms or other dangerous weapons are permitted on the premises

DRESS CODE

PRACTICAL WELDING:
Safety clothes (safety boots, full overalls with long sleeves, gloves and helmet)

ANY OTHER COURSE:
Long pants, shirt and closed shoes

Please refer to the website www.saiw.co.za for a full version of our Code of Conduct and Policies.
